The Loss Of Order Project Syndicate S 2014 Year In Review:

Environmental Politics in the Middle East Harry Verhoeven, 2018-09-01 This book investigates how ecology and politics meet in the Middle East and how those interactions connect to the global political economy Through region wide analyses and case studies from the Arabian Peninsula the Gulf of Aden the Levant and North Africa the volume highlights the intimate connections of environmental activism energy infrastructure and illicit commodity trading with the political economies of Central Asia the Horn of Africa and the Indian subcontinent The book's nine chapters analyze how the exploitation and representation of the environment have shaped the history of the region and determined its place in global politics It argues that how the ecological is understood instrumentalized and intervened upon is the product of political struggle deconstructing ideas and practices of environmental change means unravelling claims of authority and legitimacy This is particularly important in a region frequently seen through the prism of environmental determinism where ruling elites have imposed authoritarian control as the corollary of environmental crisis This unique and urgent collection will question much of what we think we know about this pressing issue

Fanon, Žižek, and the Violence of Resistance Zahi Zalloua, 2025-06-26 In a novel pairing of anti colonial theorist Frantz Fanon with Marxist Lacanian philosopher Slavoj Žižek Zahi Zalloua explores the ways both thinkers expose the violence of political structures This inventive exploration advances an anti racist critique describing how ontology operates in a racial matrix to produce some human bodies that count and others deemed not quite or non human that do not For Fanon and Žižek the violence of ontology must be met with another form of violence a revolutionary violence that delegitimizes the logic of the symbolic order and troubles its collective fantasies Whereas Fanon begins his challenge to ontology by exposing its historical linkages to Europe's destructive imperialist procedures before proceeding to stretch Marxism along with psychoanalysis to account for the crushing neo colonial situation Žižek premises his work on the refusal to accept the totality of ontology Because of these different points of intervention Fanon and Žižek together offer a powerful and multifaceted assessment of the liberal anti racist paradigm whose propensity for identity politics and aversion to class struggle silence the cry of the dispossessed and foreclose radical change Avoiding contemporary separatist temptations decoloniality and Afropessimism and breaking with a non violent sentimentalist futurology that announces more of the same Fanon and Žižek point in a different direction one that eschews identitarian thought in favor of a collective struggle for freedom and equality

Things Don't Fall Apart Ilene Grabel, 2019-08-06 An account of the significant though gradual uneven disconnected ad hoc and pragmatic innovations in global financial governance and developmental finance induced by the global financial crisis In When Things Don't Fall Apart Ilene Grabel challenges the dominant view that the global financial crisis had little effect on global financial governance and developmental finance Most observers discount all but grand systemic ruptures in institutions and policy Grabel argues instead that the global crisis induced inconsistent and ad hoc discontinuities in global financial governance and developmental finance that are now having profound effects on emerging market and developing economies Grabel's chief normative claim is that the resulting incoherence in global financial governance is productive rather than debilitating In the age of productive incoherence a more complex dense fragmented and pluripolar form of global financial governance is expanding possibilities for policy and institutional experimentation policy space for economic and human development financial stability and resilience and financial inclusion Grabel draws on key theoretical commitments of Albert Hirschman to cement the case for the productivity of incoherence Inspired by Hirschman Grabel demonstrates that meaningful change often emerges from disconnected erratic experimental and inconsistent adjustments in institutions and policies as actors pragmatically manage in an evolving world Grabel substantiates her claims with empirically rich case studies that explore the effects of recent crises on networks of financial governance such as the G 20 transformations within the IMF institutional innovations in liquidity support and project finance from the national to the transregional levels and the rebranding of capital controls Grabel concludes with a careful examination of the opportunities and risks associated with the evolutionary transformations underway

the greatest engine of material well being that the world has ever seen But scepticism about its viability has grown across the political spectrum on the back of rising inequalities climate change and digital disruptions This book joins the debate about the crisis of capitalism not by blindly defending the system but by advocating concrete proposals to put it on a more socially and environmentally sustainable path Too often conversations about the future of capitalism consider it as a homogeneous socio economic system whose features vary little from one location to another this commonly leads to one size fits all recommendations to address capitalism s flaws The contributors to this book by contrast look at the transition needed from the perspective of capitalism s multi faceted nature in response to challenges including the green transition the digital revolution and spiralling inequalities These present difficult trade offs in terms of growth efficiency and stability which each capitalist model will solve differently

The New Power Elite Alan Shipman, June Edmunds, Bryan Turner, 2018-04-13 Elites have always ruled wielding inordinate power and wealth taking decisions that shape life for the rest In good times the 1% can hide their privilege or use growing social mobility and economic prosperity as a justification When times get tougher there s a backlash So the first years of the twenty first century a time of financial crashes oligarchy and corruption in the West persistent poverty in the south and rising inequality everywhere have brought elites and establishments under unprecedented fire Yet those swept to power by this discontent are themselves a part of the elite attacking from within and extending rather than ending its agenda The New Power Elite shows how major political and social change is typically driven by renegade elite fractions who co opt or sideline elites traditional enemies It is the first book to combine the politics economics sociology and history of elite rule to present a compact comprehensive account of who s at the top and why we let them get there
