Primate Life Histories, Sex Roles, and Adaptability Urs Kalbitzer, Katharine M. Jack, 2018-10-29 Professor Linda M Fedigan Member of the Order of Canada and a Fellow of the Royal Society of Canada has made major contributions to our understanding of the behavioural ecology of primates Furthermore Linda Fedigan pioneered and continues to advance scholarship on the role of women in science as well as actively promoting the inclusion of women in the academy A symposium in honour of her career was held in Banff Alberta Canada in December 2016 during which former and current students and collaborators as well as scientists with similar research interests presented and discussed their work and their connections to Linda Fedigan These presentations and discussions are here presented as chapters in this festschrift The original works presented in this book are organized around four major research areas that have been greatly advanced and influenced by Linda Fedigan Primate life

histories Sex roles gender and science Primate environment interactions Primate adaptation to changing environments

African Study Monographs ,2005 Primates and Cetaceans Juichi Yamagiwa,Leszek Karczmarski,2013-11-20 In this book the editors present a view of the socioecology of primates and cetaceans in a comparative perspective to elucidate the social evolution of highly intellectual mammals in terrestrial and aquatic environments Despite obvious differences in morphology and eco physiology there are many cases of comparable sometimes strikingly similar patterns of sociobehavioral complexity A number of long term field studies have accumulated a substantial amount of data on the life history of various taxa foraging ecology social and sexual relationships demography and various patterns of behavior from dynamic fission fusion to long term stable societies from male bonded to bisexually bonded to matrilineal groups Primatologists and cetologists have come together to provide four evolutionary themes 1 social complexity and behavioral plasticity 2 life history strategies and social evolution 3 the interface between behavior demography and conservation and 4 selected topics in comparative behavior These comparisons of taxa that are evolutionarily distant but live in comparable complex sociocognitive environments boost our appreciation of their sophisticated mammalian societies and can advance our understanding of the ecological factors that have shaped their social evolution This knowledge also facilitates a better understanding of the day to day challenges these animals face in the human dominated world and may improve the capacity and effectiveness of our conservation efforts *The Monkeys of Stormy Mountain* Jean-Baptiste Leca,Michael A. Huffman,Paul L. Vasey,2012-01-19 The Arashiyama group of Japanese macaques holds a distinguished place in primatology as one of the longest continuously studied non human primate populations in the world The resulting long term data provide a unique resource for researchers allowing them to move beyond cross sectional studies to tackle larger issues involving individual matrilineal and group histories This book presents an overview of the scope and magnitude of research topics and management efforts that have been conducted on this population for several decades covering not only the original troop living around Kyoto Japan but also the two subgroups that were translocated to Texas USA and Montreal Canada The chapters encompass topics including life history sexual social and cultural behaviour and ecology giving an insight into the range of current primatological research The contributors underscore the historic value of the Arashiyama macaques and showcase new and significant research findings that highlight their continuing importance to primatology **International Journal of Primatology** ,2006

Systematic Review of Japanese Macaques, Macaca Fuscata (Gray, 1870) Jack Fooden,Mitsuru Aimi,2005 **Social Behavior of Female Vertebrates** Samuel Wasser,2012-12-02 Social Behavior of Female Vertebrates focuses on the evolution of reproductive behavior in female vertebrates ranging from fish to birds and humans including issues of mate choice and other factors underlying female attitudes toward males It also looks at the evolution of mating systems the co evolution of the sexes sex role reversal reproductive competition between females maternal behavior and how females enhance the investment received by their offspring from others It also considers other social behaviors that influence the

nature of affiliative associations between females Organized into three parts encompassing 13 chapters this volume begins with an overview of behavioral biology and sources of variation in female reproductive success It then discusses the establishment and maintenance of sex biases sex differences mediated by sexual selection constraints on female choice in the mottled sculpin mate choice by females in sexual selection of bird song and female manipulation of male avoidance of cuckoldry behavior in the ring dove The reader is also introduced to the evolution of polyandry in shorebirds reproductive strategies in human females social and health seeking behaviors of Taiwanese women female roles in cooperatively breeding acorn woodpeckers altruism in coati bands cooperation and reproductive competition among female African elephants mate choice in matrilineal macaque groups and reproductive competition and cooperation among female yellow baboons This book is a valuable resource for scientists and behavioral biologists as well as lay people whose interests span a variety of fields

Behavioral Primatology A. M. Schrier, 2013-11-26 First published in 1977 The volume of research on nonhuman primates has expanded tremendously during the past 20 years and researchers familiarity with them has increased correspondingly This series of volumes deals with scientific studies of the behavior of nonhuman primates apes monkeys and prosimians The behavior of these animals is of course of interest in its own right But then so is that of the many other orders of animals Behavior of nonhuman primates is of special interest because these animals are more closely related to human beings structurally physiologically and beyond doubt behaviorally than are any other living animals Centralizing Fieldwork Jeremy MacClancy, Agustín Fuentes, 2010-12-01 Fieldwork is a central method of research throughout anthropology a much valued much vaunted mode of generating information But its nature and process have been seriously understudied in biological anthropology and primatology This book is the first ever comparative investigation across primatology biological anthropology and social anthropology to look critically at this key research practice It is also an innovative way to further the comparative project within a broadly conceived anthropology because it does not focus on common theory but on a common method The questions asked by contributors are what in the pursuit of fieldwork is common to all three disciplines what is unique to each how much is contingent how much necessary Can we generate well grounded cross disciplinary generalizations about this mutual research method and are there any telling differences Co edited by a social anthropologist and a primatologist the book includes a list of distinguished and well established contributors from primatology and biological anthropology **Chimpanzee Culture Wars** Nicolas Langlitz, 2020-09-08 The first ethnographic exploration of the contentious debate over whether nonhuman primates are capable of culture In the 1950s Japanese zoologists took note when a number of macaques invented and passed on new food washing behaviors within their troop The discovery opened the door to a startling question Could animals other than humans share social knowledge and thus possess culture The subsequent debate has rocked the scientific world pitting cultural anthropologists against evolutionary anthropologists field biologists against experimental psychologists and scholars from Asia against their colleagues in Europe

and North America In *Chimpanzee Culture Wars* the first ethnographic account of the battle anthropologist Nicolas Langlitz presents first hand observations gleaned from months spent among primatologists on different sides of the controversy Langlitz travels across continents from field stations in the Ivory Coast and Guinea to laboratories in Germany and Japan As he compares the methods and arguments of the different researchers he meets he also considers the plight of cultural primatologists as they seek to document chimpanzee cultural diversity during the Anthropocene an era in which human culture is remaking the planet How should we understand the chimpanzee culture wars in light of human caused mass extinctions Capturing the historical anthropological and philosophical nuances of the debate *Chimpanzee Culture Wars* takes us on an exhilarating journey into high tech laboratories and breathtaking wilderness all in pursuit of an answer to the question of the human animal divide *Mahale Chimpanzees* Michio Nakamura,Kazuhiko Hosaka,Noriko Itoh,Koichiro Zamma,2015-09-10 A major contribution to great ape research covering every aspect of the Mahale Mountain Chimpanzee Project to offer new unique insights [Developing a Social Psychology of Monkeys and Apes](#) John Chadwick-Jones,2025-01-06 Originally published in 1998 the aim of *Developing a Social Psychology of Monkeys and Apes* was to draw attention to the exciting progress of studies of the social psychology of monkeys and apes happening at the time It is written with a clear style which should invite interest from a wide range of social scientists The relatedness of humans and non human primates that was usually considered in its genetic forms is followed through into the complex social tactics of monkeys and apes The focus of the book was on the latest research as it had developed out of earlier classic studies The wave of researchers working on social topics at the time is especially emphasized This book will be of particular interest to primatologists ethologists anthropologists zoologists social psychologists and students of social cognition and social interaction For students the appendices provide useful information on the variety of social structures of Old World and New World monkeys and apes **Paternity in Primates: Genetic Tests and Theories** R. D. Martin,A. F. Dixon,E. J. Wickings,1991-12-10 **Post-Genome Biology of Primates** Hirohisa Hirai,Hiroo Imai,Yasuhiro Go,2012-04-23 In 2001 first reports of the human draft genome were published Since then genomes of many other organisms have been sequenced including several primate species the chimpanzee rhesus macaque gorilla orangutan gibbon baboon marmoset tarsier galago lemur and more recently Neanderthals In a new era of post genome biology scientists now have the vast amount of information revealed by genome research to confront one of the most challenging fundamental questions in primatology and anthropology What makes us human This volume comprises a collection of articles on a variety of topics relevant to primate genomes including evolution human origins genome structure chromosome genomics and bioinformatics The book covers the cutting edge research in molecular primatology and provides great insights into the functional diversity of primates This valuable collection will benefit researchers and students including primatologists anthropologists molecular biologists evolutionary biologists and animal behaviorists *The International Encyclopedia of Primatology, 3 Volume Set* Agustín

Fuentes,2017-04-24 The International Encyclopedia of Primatology represents the first comprehensive encyclopedic reference focusing on the behaviour biology ecology evolution genetics and taxonomy of human and non human primates Represents the first comprehensive encyclopedic reference relating to primatology Features more than 450 entries covering topics ranging from the taxonomy history behaviour ecology captive management and diseases of primates to their use in research cognition conservation and representations in literature Includes coverage of the basic scientific concepts that underlie each topic along with the latest advances in the field Highly accessible to undergraduate and graduate students in primatology anthropology and the medical biological and zoological sciences Essential reference for academics researchers and commercial and conservation organizations This work is also available as an online resource at www.encyclopediaofprimatology.com

Development of Cognition, Affect, and Social Relations W. A. Collins,2014-03-18 First published in 1982 This thirteenth volume in The Minnesota Symposia on Child Psychology set invites six developmental scholars were to present their work within the programmatic perspective in which it was conceived The contributors to this volume work within the area of developmental social psychology encompassing the range of problems surrounding the development of social relations social cognition and affective systems There is variation not only in the domains of interest but in the methods and the ages of the participants in the research within this volume

Natural Conflict Resolution Filippo Aureli,Frans B. M. Waal,2000-08-07 Filippo Aureli and Frans De Waal have succeeded in cross fertilizing fields as disparate as ethology and medieval law to create a rich new field of research natural conflict resolution It makes one see conflict resolution among humans through a new and fascinating lens This is a landmark contribution William Ury co author Getting to YES author of Getting Past No and Getting to Peace

Primate Behavioral Ecology Karen B. Strier,2015-07-22 Primate Behavioral Ecology described as an engaging cutting edge exposition incorporates exciting new discoveries and the most up to date approaches in its introduction to the field and its applications of behavioral ecology to primate conservation This unique comprehensive single authored text integrates the basics of evolutionary ecological and demographic perspectives with contemporary noninvasive molecular and hormonal techniques to understand how different primates behave and the significance of these insights for primate conservation Examples are drawn from the classic primate field studies and more recent studies on previously neglected species from across the primate order illustrating the vast behavioral variation that we now know exists and the gaps in our knowledge that future studies will fill
