Exercises are included to encourage reflection on practice and develop critical thinking skills. It also promotes the expansion of professional knowledge through the development of portfolio evidence. Building on the outstanding success of previous editions, the authors have drawn extensively on current best evidence including research, policy and substantial internet based resources reflecting UK and international perspectives. Each chapter begins with an overview of the content and concludes with a summary to help evaluate learning. Case studies reflect the diverse range of client needs and care settings of the four nursing branches and help relate theory to practice. Reflective exercises and suggestions for portfolio evidence along with decision making activities promote reflection on personal experience and links to nursing practice using a problem based approach. Current research is highlighted throughout demonstrating the evidence base for practice decisions. Key web sites, annotated further reading and references encourage readers to pursue contemporary evidence that underpins competency based practice. Full colour throughout.
