The Architecture of Late Assyrian Royal Palaces David Kertai, 2015-03-26 The Late Assyrian Empire c 900 612 BCE was the first state to rule over the major centres of the Middle East and the Late Assyrian court inhabited some of the most monumental palaces of its time The Architecture of Late Assyrian Royal Palaces is the first volume to provide an in depth analysis of Late Assyrian palatial architecture offering a general introduction to all key royal palaces in the major centres of the empire Assur Kal u Dur Sharruken and Nineveh Where previous research has often focused on the duality between public and private realms this volume redefines the cultural principles governing these palaces and proposes a new historical framework analysing the spatial organization of the palace community which placed the king front and centre It brings together the architecture of such palaces as currently understood within the broader framework of textual and art historical sources and argues that architectural changes were guided by a need to accommodate ever larger groups as the empire grew in size

Scarabs, Chronology, and Interconnections Daphna Ben-Tor, 2007 Anhand der Fossilien des Pillendreher Skarabaus erforscht Daphna Ben Tor die Beziehungen zwischen Agypten und der Levante im Zeitraum der 12 und 13 Dynastie Schon vor langerer Zeit wurde die Bedeutung von Skarabaen Fossilien zur historischen Rekonstruktion des Verhältnisses zwischen Agypten und der Levante entdeckt Doch die Kontroverse über die Typologie von Skarabaen schloss sie als verlässliche historische Quelle aus Diese Studie schlägt eine neue Typologie der Pillendreher für die erste Hälfte des zweiten Jahrtausends v Ch vor die sich an den Erkenntnissen zu

agyptischen und levantischen Keramik Sammlungen orientiert Basierend auf diesen Forschungen kann das Alter der Erdschicht bestimmt werden in welcher die Skarabaen und Abdrucke in beiden Regionen gefunden wurden und die Verbindung zwischen der zweiten mittleren Periode in Agypten und der mittleren Bronzezeit IIB in der Levante nachgewiesen werden Der prinzipielle methodologische Unterschied zwischen der heutigen und der fruheren Forschung liegt im Verstandnis der agyptischen und palastinensischen Skarabaen als zweier statt vormals einer Gruppe Die neue Sicht erlaubt eine systematische Unterscheidung agyptischer und kanaanitischer Skarabaen dieser Zeit und fuhrt zu einer separaten stilistischen und chronologischen Typologie fur jede Gruppe Die Schlussfolgerungen welche in dieser Studie prasentiert werden zeigen die Signifikanz der Skarabaen als Hauptinformationsquelle fur die Rekonstruktion der Geschichte der 12 und 13 Dynastie

The Social Life of the Lion J.A. Rudnai, 2012-12-06 THE HABITAT Nairobi National Park lies to the south southeast of the capital of Kenya Nairobi where the Athi Plains meet the Eastern escarpment of the Rift Valley These plains form part of the semi arid highland plateau lying between the coast and the Rift Valley Both the city itself and the Park bordering it are a meeting place of two generally distinct types of landscape and climate While to the east southeast are semi arid plains with grasslands and scattered trees the western north western parts are higher hilly cooler more humid and support lush forests The combination of latitude a little over one degree south of the Equator and altitude average of 1600 m 5000 5500 ft combine to give Nairobi a most equable climate where the temperature varies during the year between about 11 degrees and 27 degrees centigrade mean minimum and mean maximum for eight years

However considerable changes are usually experienced within each day and a rise from 14 degrees C at 0600 hours to 22 degrees at 1100 hours is not unusual Nairobi Park has a unique concentration of wild animals living in their natural habitat less than 10 km from the centre of a modern city of half a million people The only interference with the natural course of events in the Park is that normally required for the proper management of a game park such as maintenance of roads and dams and in this particular case partial fencing towards the city

Incised Drawings from Early Phrygian Gordion Lynn E. Roller, 2011-09-01 In 1950 the University of Pennsylvania Museum of Archaeology and Anthropology began excavations at the ancient Phrygian capital of Gordion in central Turkey The Museum's Gordion Project continues today with researchers from many disciplines and with many specializations contributing to a growing and sometimes changing body of information and understanding about this complex and multifaceted site inhabited by peoples and diverse civilizations for millennia In this volume of Gordion Special Studies Lynn E Roller focuses on a series of stone blocks with incised figural and abstract drawings recovered from early Phrygian structures at Gordion The great majority of the incised stones come from a single structure within the Early Phrygian citadel at Gordion known as Megaron 2 a stone building with several remarkable features and a likely candidate for the citadel's temple The volume begins with a description of the excavation of the stones and a discussion of Megaron 2 Next is an analysis of the subject matter of the drawings by type describing scenes of human figures animals architectural drawings geometric patterns and formless marks A discussion follows of the sources from which the drawings could have been taken and of parallels with similar scenes and designs on objects in other media from Gordion and other contemporary sites in Anatolia The fourth section proposes an explanatory hypothesis on the origin of the drawings and considers who could have made them and why Parallels with comparable drawings from Anatolia and the Near East are discussed here The final section summarizes the contribution of the drawings to our understanding of the development of the Early Phrygian material at Gordion University Museum Monograph 130
