The Interlopers Test:

The Interlopers Vera Keller, 2023-04-18 A reframing of how scientific knowledge was produced in the early modern world Winner of the Phyllis Goodhart Gordan Book Prize by the Renaissance Society of America and the Leo Gershoy Prize by the American Historical Association Shortlisted for the Jon Ben Snow Prize by the North American Conference of British Studies Many accounts of the scientific revolution portray it as a time when scientists disciplined knowledge by first disciplining their own behavior According to these views scientists such as Francis Bacon produced certain knowledge by pacifying their emotions and concentrating on method In *The Interlopers* Vera Keller rejects this emphasis on discipline and instead argues that what distinguished early modernity was a navigation away from restraint and toward the violent blending of knowledge from across society and around the globe Keller follows early seventeenth century English projectors as they traversed the world pursuing outrageous entrepreneurial schemes along the way These interlopers were developing a different culture of knowledge one that aimed to take advantage of the disorder created by the rise of science and technological advances They sought to deploy the first submarine in the Indian Ocean raise silkworms in Virginia and establish the English slave trade These projectors developed a culture of extreme risk taking uniting global capitalism with martial values of violent conquest They saw the world as a riskscape of empty spaces disposable people and unlimited resources By analyzing the disasters as well as a few successes of the interlopers she studies Keller offers a new interpretation of the nature of early modern knowledge itself While many influential accounts of the period characterize European modernity as a disciplining or civilizing process *The Interlopers* argues that early modernity instead entailed a great undisciplining that entangled capitalism colonialism and science Second Corinthians (Paideia: Commentaries on the New Testament) Raymond F.

Collins, 2013-06-15 In this addition to the well received Paideia series a respected senior New Testament scholar examines cultural context and theological meaning in Second Corinthians Paideia commentaries explore how New Testament texts form Christian readers by attending to the ancient narrative and rhetorical strategies the text employs showing how the text shapes theological convictions and moral habits commenting on the final canonical form of each New Testament book focusing on the cultural literary and theological settings of the text making judicious use of maps photos and sidebars in a reader friendly format Students pastors and other readers will appreciate the historical literary and theological insight offered in this practical commentary **Computational Intelligence in Analytics and Information Systems** Parneeta

Klebanov, Nitin Madnani, 2021-11-12 This book discusses the state of the art of automated essay scoring its challenges and its potential One of the earliest applications of artificial intelligence to language data along with machine translation and speech recognition automated essay scoring has evolved to become both a revenue generating industry and a vast field of research with many subfields and connections to other NLP tasks In this book we review the developments in this field against the backdrop of Elias Page's seminal 1966 paper titled The Imminence of Grading Essays by Computer Part 1 establishes what automated essay scoring is about why it exists where the technology stands and what are some of the main issues In Part 2 the book presents guided exercises to illustrate how one would go about building and evaluating a simple automated scoring system while Part 3 offers readers a survey of the literature on different types of scoring models the aspects of essay quality studied in prior research and the implementation and evaluation of a scoring engine Part 4 offers a broader view of the field inclusive of some neighboring areas and Part 5 closes with summary and discussion This book grew out of a week long course on automated evaluation of language production at the North American Summer School for Logic Language and Information NASSLLI attended by advanced undergraduates and early stage graduate students from a variety of disciplines Teachers of natural language processing in particular will find that the book offers a useful foundation for a supplemental module on automated scoring Professionals and students in linguistics applied linguistics educational technology and other related disciplines will also find the material here useful *Letters of Publicola. The Growth of English Industry and Commerce in Modern Times William Cunningham,1907 **The Tip of the Tongue State** Alan S. Brown,2012-04-27 This book brings together the body of empirical findings and theoretical interpretations of the tip of the tongue TOT experience when a well known or familiar word cannot immediately be recalled Although research has been published on TOTs for over a century the experience retains its fascination for both cognitive and linguistic researchers After a review of various research procedures used to study TOTs the book offers a summary of attempts to manipulate this rare cognitive experience through cue and prime procedures Various aspects of the inaccessible target word are frequently available such as first letter and syllable number even in the absence of actual retrieval and the book explores the implications of these bits of target word information for mechanisms for word storage and retrieval It also examines what characteristics of a word make it potentially more vulnerable to a TOT why words related to the target word called
