The Killing Of History

Jacob Neusner

The Killing Of History:

The Killing of History Keith Windschuttle, 1996 This book is a critique of the major developments over the last decade in the writing of history the emergence of post structuralist and postmodernist approaches to the study of the past

Race and the Writing of History Maghan Keita, 2000-11-30 Despite increased interest in recent years in the role of race in Western culture scholars have neglected much of the body of work produced in the nineteenth and twentieth centuries by black intellectuals For example while DuBois thoughts about Africa may be familiar to contemporary academics those of his important precursors and contemporaries are not widely known Similarly although contemporary figures such as Martin Bernal Molefi Assante and other Afrocentrists are the subject of heated debate such debates are rarely illuminated by an awareness of the traditions that preceded them *Race and The Writing of History* redresses this imbalance using Bernal s *Black Athena* and its critics as an introduction to the historical inquiries of African American intellectuals and many of their African counterparts Keita examines the controversial legacy of writing history in America and offers a new perspective on the challenge of building new historiographies and epistemologies As a result this book sheds new light on how ideas about race and racism have shaped the stories we tell about ourselves

A History of the Mishnaic Law of Damages, Volume 1: Baba Qamma Jacob Neusner, 2023-09-25 The history of Jews from the period of the Second Temple to the rise of Islam

A History of the Mishnaic Law of Damages, Part 1 Jacob Neusner, 2007-04-01 The history of Jews from the period of the Second Temple to the rise of Islam From *A History of the Mishnaic Law of Appointed Times Part 1* This volume introduces the sources of Judaism in late antiquity to scholars in adjacent fields such as the study of the Old and New Testaments Ancient History the ancient Near East and the history of religion In two volumes leading American Israeli and European specialists in the history literature theology and archaeology of Judaism offer factual answers to the two questions that the study of any religion in ancient times must raise The first is what are the sources written and in material culture that inform us about that religion The second is how have we to understand those sources in reconstructing the history of various Judaic systems in antiquity The chapters set forth in simple statements intelligible to non specialists the facts which the sources provide Because of the nature of the subject and acute interest in it the specialists also raise some questions particular to the study of Judaism dealing with its historical relationship with nascent Christianity in New Testament times The work forms the starting point for the study of all the principal questions concerning Judaism in late antiquity and sets forth the most current critical results of scholarship

The Textual History of the Bible from the Dead Sea Scrolls to the Biblical Manuscripts of the Vienna Papyrus Collection Ruth A. Clements, Russell Fuller, Armin Lange, Paul D. Mandel, 2023-03-20

Biblical manuscripts from the Dead Sea and the Cairo Genizah have added immeasurably to our knowledge of the textual history of the Hebrew Bible. The papers collected in this volume compare the evidence of the biblical DSS with manuscripts from the Vienna Papyrus Collection connected with the Cairo Genizah as well as late ancient evidence from diverse contexts. The resulting picture is one of a dialectic between textual plurality and fixity, the eventual dominance of the consonantal Masoretic Text over the textual plurality of the Second Temple period and the secondary diversification of that standardized text through scribal activity.

The Cambridge History of American Literature: Volume 7, Prose Writing, 1940-1990 Sacvan Bercovitch, Cyrus R. K. Patell, 1994. Volume VII of the Cambridge History of American Literature examines a broad range of American literature of the past half century revealing complex relations to changes in society. Christopher Bigsby discusses American dramatists from Tennessee Williams to August Wilson showing how innovations in theatre anticipated a world of emerging countercultures and provided America with an alternative view of contemporary life. Morris Dickstein describes the condition of rebellion in fiction from 1940 to 1970 linking writers as diverse as James Baldwin and John Updike. John Burt examines writers of the American South describing the tensions between modernization and continued entanglements with the past. Wendy Steiner examines the postmodern fictions since 1970 and shows how the questioning of artistic assumptions has broadened the canon of American literature. Finally Cyrus Patell highlights the voices of Native American, Asian American, Chicano, gay and lesbian writers often marginalized but here discussed within and against a broad set of national traditions.

The Palgrave Handbook of State-Sponsored History After 1945 Berber Bevernage, Nico Wouters, 2018-02-03. This handbook provides the first systematic integrated analysis of the role that states or state actors play in the construction of history and public memory after 1945. The book focuses on many different forms of state sponsored history including memory laws, monuments and memorials, state archives, science policies, history in schools, truth commissions, historical expert commissions, the use of history in courts and tribunals etc. The handbook contributes to the study of history and public memory by combining elements of state focused research in separate fields of study. By looking at the state's memorialising capacities the book introduces an analytical perspective that is not often found in classical studies of the state. The handbook has a broad geographical focus and analyses cases from different regions around the world. The volume mainly tackles democratic contexts although dictatorial regimes are not excluded.

[The Massacre in History](#) Mark Levene, Penny Roberts, 1999. The role of massacre in history has been given little focused attention either by historians or academics in related fields. This is surprising as its prevalence and persistence surely demands that it should be a subject of serious and systematic exploration. What exactly is a massacre? When and why does it happen? Is there a cultural as well as political framework within which it occurs? How do human societies respond to it? What are its social and economic repercussions? Are massacres catalysts for change or are they part of the continuity of the human saga? These are just some of the questions the authors address in this important volume.

Chronologically and geographically broad in scope *The Massacre in History* provides in depth analysis of particular massacres and themes associated with them from the 11th century to the present Specific attention is paid to 15th century Christian Jewish relations in Spain the St Batholemew s Day massacre England and Ireland in the civil war era the 19th century Caucasus the rape of Nanking in 1937 and the Second World War origins of the Serb Croat conflict The book explores the subject of massacre from a variety of perspectives its relationship to politics culture religion and society its connection to ethnic cleansing and genocide and its role in gender terms and in relation to the extermination of animals The historians provide evidence to suggest that the massacre is often central to the course of human development and societal change

History of the Laws of War Christopher W. Mullins, 2023-08-24 Rooted in critical historical documents from the Tudors to the American Revolution this rich history the first of two volumes provides a cogent understanding of how the current historical moment has developed as well as of the potential paths that lie ahead *A History of the Laws of War: Volume 1*

Alexander Gillespie, 2011-09-06 This unique new work of reference traces the origins of the modern laws of warfare from the earliest times to the present day Relying on written records from as far back as 2400 BCE and using sources ranging from the Bible to Security Council Resolutions the author pieces together the history of a subject which is almost as old as civilisation itself The author shows that as long as humanity has been waging wars it has also been trying to find ways of legitimising different forms of combatants and regulating the treatment of captives This first book on warfare deals with the broad question of whether the patterns of dealing with combatants and captives have changed over the last 5 000 years and if so how In terms of context the first part of the book is about combatants and those who can lawfully take part in combat In many regards this part of the first volume is a series of less than ideal pathways This is because in an ideal world there would be no combatants because there would be no fighting Yet as a species we do not live in such a place or even anywhere near it either historically or in contemporary times This being so a second best alternative has been to attempt to control the size of military forces and therefore the bloodshed This is also not the case by which humanity has worked over the previous centuries Rather the clear assumption for thousands of years has been that authorities are allowed to build the size of their armed forces as large as they wish The restraints that have been applied are in terms of the quality and methods by which combatants are taken The considerations pertain to questions of biology such as age and sex geographical considerations such as nationality and the multiple nuances of informal or formal combatants These questions have also overlapped with ones of compulsion and whether citizens within a country can be compelled to fight without their consent Accordingly for the previous 3 000 years the question has not been whether there should be a limit on the number of soldiers but rather who is or is not a lawful combatant It has rarely been a question of numbers It has been and remains one of type The second part of this book is about people typically combatants captured in battle It is about what happens to their status as prisoners about the possibilities of torture assistance if they are wounded and what happens to their remains should they be killed and their bodies fall into enemy hands The theme that ties all of these considerations together is that all of the acts befall those who are to one degree or another captives of their enemies As such they are no longer masters of their own fate As a work of reference this first volume as part of a set of three is unrivalled and will be of immense benefit to scholars and practitioners researching and advising on the laws of warfare It also tells a story which throws fascinating new light on the history of international law and on the history of warfare itself
