The M14 Battle Rifle Weapon:

The M14 Battle Rifle Leroy Thompson, 2014-10-20 The M14 may have only been the primary US service rifle for a little over a decade before being replaced by the M16 but it is still considered by many experts to be the best rifle to ever see US service. Primarily designed for a war in Europe where it would take its place alongside the other battle rifles like the FN FAL, the M14 saw most of its combat use in the early days of the Vietnam War. Maintained until 1970 for compatibility with NATO forces, the M14 had a renaissance as a semi-automatic sniping weapon and since 2001 the M14 has been employed as a Designated Marksman Rifle, being employed by all branches of the US military especially in Afghanistan where the open terrain makes longer range engagements common. Featuring specially commissioned full color artwork and archive and close up photographs, this engaging study tells the story of the M14, the long lived battle rifle that remains in front line service with US forces more than 50 years after its first adoption. *Weapons of the US Special Operations Command* Chris McNab, 2019-07-25

The units and formations of the US Special Operations Command SOCOM have privileged access to the finest weaponry in the world's arsenal. Whether Army, Navy, Air Force or Marines, the SOCOM troops select weapons that match their mission requirements but which also sit at the cutting edge of combat technology. This means that while SOCOM troops frequently use standard issue weaponry, they also adopt many specialist pieces of kit that are not so accessible to the broader armed services, including sniper rifles, battle rifles and machine guns, as well as high tech tactical accessories used to transform standard weaponry into something exceptional. Assessing the technology and capabilities of these combat weapons, as well as how they have been used in modern combat, this fully illustrated study lifts the veil on some of the most distinctive hand held weapon systems of US special operations forces since 1987. **The Battle Rifle** Russell C. Tilstra, 2014-04-04

While the 20th century brought many technological advancements to the battlefield, a key weapon of warfare remains the soldier and his rifle. This volume chronicles the historical development of the modern service rifle after World War II and examines its resurgence in Afghanistan after generations of absence following the introduction of the assault rifle. Individual chapters survey the most combat tested models, including the FN FAL, US M14 and HK 417, in technical detail, emphasizing key points in the evolution of rifle technology and ammunition. Also explored is the development of the current M16 series rifle and how recent difficulties in Afghanistan have led to an increasing reliance on the venerable M14. Providing a strong knowledge base of the various weapons now in service throughout the world, this instructive work demonstrates that the battle rifle has not outlived its usefulness. *The FN FAL Battle Rifle* Bob Cashner, 2013-08-20 Of all the infantry small arms developed during World War II, one that generated the most interest was the German assault rifle, the StG 44 Sturmgewehr. This innovative weapon inspired the Soviet AK 47 in 7.62x39mm calibre. In the West, the NATO countries looked hard at new weapons to upgrade their own infantry arsenals and counter the AK 47, resulting in the design of the Fusil Automatique Lebel or FAL. It proved to be a successful battle rifle and was soon adopted by the military and police forces of no fewer than 93

nations The FAL dominated the militaries of the West to such a degree that its nickname became the Right Arm of the Free World The FAL fulfilled every role it was asked to perform and remains a viable and well respected weapon to this day

US Air Cavalry Trooper vs North Vietnamese Soldier Chris McNab,2020-09-17 The tactics and technologies of modern air assault vertical deployment of troops by helicopter or similar means emerged properly during the 1950s in Korea and Algeria Yet it was during the Vietnam War that helicopter air assault truly came of age and by 1965 the United States had established fully airmobile battalions brigades and divisions including the 1st Cavalry Division Airmobile This division brought to Vietnam a revolutionary new speed and dexterity in battlefield tactics using massed helicopters to liberate its soldiers from traditional overland methods of combat manoeuvre However the communist troops adjusted their own thinking to handle airmobile assaults Specializing in ambush harassment infiltration attacks and small

scale attrition the North Vietnamese operated with light logistics and a deep familiarity with the terrain They optimized their defensive tactics to make landing zones as hostile as possible for assaulting US troops and from 1966 worked to draw them into Hill Traps extensive kill zones specially prepared for defence in depth By the time the 1st Cavalry Division Airmobile withdrew from Vietnam in 1972 it had suffered more casualties than any other US Army division Featuring specially commissioned artwork archive photographs and full colour battle maps this study charts the evolution of US airmobile tactics pitted against North Vietnamese countermeasures The two sides are analysed in detail including training logistics weaponry and organization **Infantry** ,2008 Small Arms Chris McNab,2015-07-15 The World s Greatest Small Arms features 52 weapons from the late 19th century to the present day Each weapon is illustrated with a colour profile artwork and photographs along with a description of the weapon s development and history key features and a full specifications box
