Spring Semester 2014 Pasadena City College Begin:

A College for All Californians George R. Boggs, Lawrence A. Galizio, 2021 This is the first comprehensive and contemporary history of the largest and most diverse public system of higher education in the United States Serving over 2 million students annually approximately one quarter of the nation's community college undergraduates California's 116 community colleges play an indispensable role in career and transfer education in North America and have maintained an outsized influence on the evolution of postsecondary education nationally *A College for All Californians* chronicles the sector's emergence from K-12 institutions its evolving mission and growth following World War II and the G.I. Bill For Education the expansion of its ever broadening mission and its essential role in the 1960 Master Plan for Higher Education Chapters cover California's junior and community colleges development mission governance faculty finances athletics student support services and more It also examines the successes and ongoing political financial and educational challenges confronting this uniquely American educational experiment Book Features Encapsulates the evolution and contemporary status of our nation's largest and most diverse undergraduate education system Examines how the colleges were influenced by the political economic and social issues of the day Includes new historical information affecting postsecondary education in California Analyzes some of the most important current and emerging issues that will continue to influence California's community colleges

Momentum Daniel Seymour, 2015-12-07 An era of accountability has swept over the higher education landscape Everyone it seems legislatures think tanks newspapers magazines books and bloggers wants to hold colleges and universities accountable They are attaching strings to budgets producing reports that read like exposés developing clever systems to rank and sort us and writing books and articles that describe the end of college as we know it According to them we need to be reformed reimaged and rebooted *Momentum* changes the conversation from how others are holding higher education accountable to why colleges and universities need to embrace the need to demonstrate their own responsibility The responsibility paradigm that emerges fundamentally shifts the dialogue from fixing to preventing from reacting to creating from surviving to thriving To implement this new paradigm the dynamics of virtuous cycles are introduced and described These upward spirals build on their own successes and result in growing confidence a sense of vitality and resilience The future of these institutions isn't the result of outside pressure or reformers The future is something that can and should be created by those who take responsibility for it

The War of Guns and Mathematics David Aubin, Catherine Goldstein, 2014-10-07 For a long time World War I has been shortchanged by the historiography of science Until recently World War II was usually considered as the defining event for the formation of the modern relationship between science and society In this context the effects of the First World War by contrast were often limited to the massive deaths of promising young scientists By focusing on a few key places Paris Cambridge Rome Chicago and others the present book gathers studies representing a broad spectrum of positions adopted by mathematicians about the conflict from militant pacifism to military

scientific or ideological mobilization The use of mathematics for war is thoroughly examined This book suggests a new vision of the long term influence of World War I on mathematics and mathematicians Continuities and discontinuities in the structure and organization of the mathematical sciences are discussed as well as their images in various milieux Topics of research and the values with which they were defended are scrutinized This book in particular proposes a more in depth evaluation of the issue of modernity and modernization in mathematics The issue of scientific international relations after the war is revisited by a close look at the situation in a few Allied countries France Britain Italy and the USA The historiography has emphasized the place of Germany as the leading mathematical country before WWI and the absurdity of its postwar ostracism by the Allies The studies presented here help explain how dramatically different prewar situations prolonged interaction during the war and new international postwar organizations led to attempts at redrafting models for mathematical developments *DIRECTORY OF CORPORATE COUNSEL*, 2023 The Cobra Movement in Postwar Europe

Karen Kurczynski, 2020-07-12 This book examines the art of Cobra a network of poets and artists from Copenhagen Brussels and Amsterdam 1948 1951 Although the name stood for the organizers home cities the Cobra artists hailed from countries in Europe Africa and the United States This book investigates how a group of struggling young artists attempted to reinvent the international avant garde after the devastation of the Second World War to create artistic experiments capable of facing the challenges of postwar society It explores how Cobra s experimental often collective art works and publications relate to broader debates in Europe about the use of images to commemorate violent events the possibility of free expression in an art world constrained by Cold War politics the breakdown of primitivism in an era of colonial independence movements and the importance of spontaneity in a society increasingly dominated by the mass media This book will be of interest to scholars in art history 20th century modern art avant garde arts and European history **Section of Antitrust Law** American Bar Association. Christian Higher Education in Canada Stanley E. Porter, Bruce G. Fawcett, 2020-11-17 The Toronto 2018 Symposium on Christian Higher Education provided an opportunity for leaders in the Canadian Christian higher education movement to reflect deeply on its development current reality and future possibilities The Canadian Christian higher education scene comprises a wide range of institutions including Christian universities Bible colleges and seminaries and graduate schools Each type has its own distinctive history and likewise represents both challenges and opportunities Even though they are intertwined in their common purpose these higher educational institutions express this purpose in various ways This volume is a collection of the papers and plenary talks designed to share the content of the symposium with a wider audience The

papers are all written by active scholars and researchers who are connected to the member institutions of Christian Higher Education Canada CHEC They not only illustrate the quality of the scholarship at these institutions but they make their own critical contribution to an ongoing discussion regarding the role and place of Christian higher education within the wider society This volume is intended to be helpful to students faculty staff board members and supporters of Canadian and other Christian higher education institutions as well as interested individuals and scholars
