User's Manual for an Army National Guard (ARNG) Armor and Mechanized Infantry Gunnery Training Assessment Database Monte D. Smith, 1998 This user's manual describes a longitudinal database designed to permit the storage retrieval and analyses of gunnery related data generated with Army National Guard ARNG armored and mechanized infantry units The database was developed as part of an assessment of the Simulation in Training for Advanced Readiness SIMITAR time compressed gunnery training strategy as implemented in a test ARNG armored brigade Smith in publication It contains gunnery performance measures from this test brigade and from six other enhanced comparison brigades where the SIMITAR training strategy was not introduced These measures were collected from 1993 1997 and include first run and final live fire Table VIII gunnery qualification scores tank main gun ammunition expenditures related measures information needed for assessing the impact of different training strategy interventions and space set aside for recording the outcomes of training aids devices simulators and simulations TADSS usage The database is configured within a software program known as the Statistical Package for the Social Sciences SPSS Version 6.1 for Windows Its files can be exported in a number of formats including spreadsheet and database management programs as well as into a number of other statistical utilities This user's manual will help ARNG database managers use the SIMITAR database as a convenient repository for gunnery performance and related information and as a resource for future gunner related strategy impact investigations P i *Measurement, Design, and Analysis* Elazar J. Pedhazur, Liora Pedhazur Schmelkin, 2013-04-15 In textbooks and courses in statistics substantive and measurement issues are rarely if at all considered Similarly textbooks and courses in measurement virtually ignore design and analytic questions and research design textbooks and courses pay little attention to analytic and measurement issues This fragmentary approach fosters a lack of appreciation of the interrelations and interdependencies among the various aspects of the research endeavor Pedhazur and Schmelkin's goal is to help readers become proficient in these aspects of research and their interrelationships and to use that information in a more integrated manner The authors offer extensive commentaries on inputs and outputs of computer programs in the context of the topics presented Both the organization of the book and the style of presentation allow for much flexibility in choice sequence and degree of sophistication with which topics are dealt *Applied Multivariate Statistics for the Social Sciences, Fifth Edition* James P. Stevens, 2012-11-12 This best selling text is written for those who use rather than develop statistical methods Dr Stevens focuses on a conceptual understanding of the material rather than on proving results Helpful narrative and numerous examples enhance understanding and a chapter on matrix algebra serves as a review Annotated printouts from SPSS and SAS indicate what the numbers mean and encourage interpretation of the results In addition to demonstrating how to use these packages the author stresses the importance of checking the data assessing the assumptions and ensuring adequate

sample size by providing guidelines so that the results can be generalized The book is noted for its extensive applied coverage of MANOVA its emphasis on statistical power and numerous exercises including answers to half The new edition features New chapters on Hierarchical Linear Modeling Ch 15 and Structural Equation Modeling Ch 16 New exercises that feature recent journal articles to demonstrate the actual use of multiple regression Ch 3 MANOVA Ch 5 and repeated measures Ch 13 A new appendix on the analysis of correlated observations Ch 6 Expanded discussions on obtaining non orthogonal contrasts in repeated measures designs with SPSS and how to make the identification of cell ID easier in log linear analysis in 4 or 5 way designs Updated versions of SPSS 15 0 and SAS 8 0 are used throughout the text and introduced in chapter 1 A book website with data sets and more Ideal for courses on multivariate statistics found in psychology education sociology and business departments the book also appeals to practicing researchers with little or no training in multivariate methods Prerequisites include a course on factorial ANOVA and covariance Working knowledge of matrix algebra is not assumed
