For this programmer I wrote 13 chapters which teach you everything about adding reports to ASP NET and Windows applications It starts with the basics of building reports to adding charts crosstab reports sorting and grouping subreports and using the formula editor with Basic syntax and Crystal syntax The second type of programmer has been using Crystal Reports for years and is mostly concerned with how to do technical runtime customization of reports For this programmer I researched and diagrammed the undocumented report object models I included dozens of examples in both VB NET and C to show you how to modify reports manipulate different data sources XML ADO NET ODBC OLE DB stored procedures with parameters modify formulas and report parameters and integrate NET with the RAS and RDC The dozens of emails I received when the book was online were instrumental for doing a major revision of many chapters before publishing the book in hardcopy format Since releasing the book I continue to receive more emails from people They regret that the free book isn't online anymore but understand that it couldn't last forever and that the hardcopy version is even better I hope you like it and that it helps you achieve your reporting goals September 2004 Update Due to high demand I did a second printing of the book I took advantage of this opportunity to go through the book and remove all grammatical errors The content is the same but the typos have been corrected [Microsoft SQL Server 2008 Reporting Services Step by Step](#) Stacia Misner, 2009-02-25 Teach yourself how to build manage and access SQL Server 2008 reports one step at a time Whether you're a report developer IT administrator or business user this sequential learn by doing tutorial shows you how to deliver the business intelligence information your organization needs Discover how to Install and configure Reporting Services Put Report Builder and Report Designer tools to work Create interactive online reports that enable users to sort and filter data Add charts and gauges to present data visually Deploy reports to Microsoft Office SharePoint Server Monitor server performance and help secure content Use subscriptions to distribute reports via e-mail Build ad hoc reports and extend them with custom code CD features Practice exercises and code samples Fully searchable eBook For customers who purchase an ebook version of this title instructions for downloading the CD files can be found in the ebook **Microsoft SQL Server 2005 Reporting Services** Brian Larson, 2006-01-02 Microsoft's Reporting Services product is a vital part of the SQL Server 2005 business intelligence platform but it works with virtually any data source This hands-on guide explains how to transform data into insightful and interactive Web-based reports using Microsoft SQL Server 2005 Reporting Services With coverage of everything from installation to administration the book demonstrates how to use this powerful server-based reporting solution to improve business decision making and facilitate company-wide even worldwide communication *Reporting with Microsoft SQL Server 2012* James Serra, Bill Anton, 2014-03-18 This is a step-by-step tutorial that deals with Microsoft Server 2012 reporting tools SSRS and Power View If you are a BI developer consultant or architect who wishes to learn how to use SSRS and Power View and want to understand the best use for each tool then this book will get you up and running quickly No prior experience is required with either tool **System Center 2012 Configuration Manager Unleashed** Kerrie
