Teaching Practices and Equitable Learning in Children's Language Education Giannikas, Christina

Nicole, 2021-03-26 Educating children and leading them towards the path of bilingualism is a valuable and challenging task for any educator. Effective language teaching can contribute to young learners' cognitive growth, develop their problem-solving skills, enhance their comprehension abilities, and provide children with the satisfaction of succeeding in the challenge of learning a foreign language. All these issues must be taken under consideration when researching children and their teachers. The current literature indicates that further material is needed to provide professionals with different classroom situations and enhance the art of teaching children. Teaching Practices and Equitable Learning in Children's Language Education focuses on various perspectives of efficient practices, approaches, and ideas for professional development in the field of young language learners. The chapters in this book link the theoretical understanding and practical experience of teaching children languages by concentrating on teaching practices, material design, classroom management, reading, speaking, writing, and more. This book is designed for inservice and preservice teachers, administrators, teacher educators, practitioners, stakeholders, researchers, academicians, and students interested in the field of early language learning and applied linguistics at large.

KONAR, NIRA, 2011-07-30 Today acquiring English language skills has become so essential, especially for those who are looking for new jobs in reputed organizations as well as for the practising professionals. This compact and comprehensive book is a step-by-step practical guide to students, telling them how to prepare technical reports and how to acquire the basic communication skills: listening, speaking, reading, and writing. The book deals with conversation, situational dialogues, and role plays and Group Discussions (GDs). It also gives detailed discussion about Interviews: step-by-step preparation, practical and psychological preparation, the dos and don'ts for interview, besides dealing with different kinds of interviews: telephonic, videoconferencing, and others. In addition, the text stresses the importance of researching the organization and salary negotiations. Finally, the book shows the students how to make powerpoint presentations (PPTs), the structure of presentation, and using audio-visuals. This activity-based, skill-oriented, learner-centred book is designed according to the WBUT syllabus on Technical Report Writing and Language Laboratory Practice for the B.Tech students. However, it would be equally useful for B.Tech/B.E. students across the country.
