. Learning Log/ FRQ-style Question: An energy pyramid for a marine ecosystem is shown to the right. **Label each trophic level of the pyramid and provide an example of a marine organism found at each level of this pyramid. Explain why the energy available at the top layer of the pyramid is a small percentage of the energy present at the bottom of the pyramid.**

. An example of a marine organism in each trophic level is algae (producer), plankton (consumer), small fish (carnivore), shark (consumer).
