

2 QUICK OVERVIEW

The e-STUDIO232/282 builds upon the success of its predecessor with even more office productivity and data security, and continues to incorporate the same clear and sharp image reproduction quality made possible through the refined toner design and high-level imaging technology.

Demands that previously extended to high-end digital functionality and greater paper handling capabilities are now widely accessible through various standard network configurations. As a result, users gain access at all time to a fully Network MFP System — both as an efficient multifunctional solution or a stand-alone machine. For instance, exchanging electronic documents and managing various data are now carried out more easily and more securely than ever before with strong and reliable access management through individual User Authentication. Also the optional Data Overwrite Kit will securely and permanently erase unwanted data, leaving no retrievable trace behind. In addition, installing the optional Scrambler Board will offer even higher levels of security with its industrial strength encryption of any data remaining on the hard drive after copying, printing, scanning or faxing is completed. Utilising all security solutions will provide the highest industry level safeguards for protecting sensitive or classified information.

The new 2nd generation e-BRIDGE architecture provides enhanced integration of individual features and options, allowing for faster response, stress-free operation, and consistent and speedy quality copy/print/scan output. New technologies and methods

have also been adopted for better workflow control whilst keeping overall running costs at a minimum.

Additionally, the modular system architecture ensures a faster response to individual business situations with a wide array of efficient and competitive paper handling features with a maximum capacity of 3,700 sheets using all available paper sources, including standard as well as optional.

Similar to the optional configuration of their predecessors, the e-STUDIO232/282 can be readily customised for your clients needs. This creates new value and satisfaction by adding optional trays, a hole punch unit and two essential finishers that combined bring document production to a whole new level.

Adding the new low noise optional RADF unit provides the benefit of fast and accurate paper feeding of multi-page or double-sided originals and, amongst other things, assist users with productive duplex printing. Everything is at hand for creating professional in-house documentation.
