3D Television (3DTV) Technology, Systems, and Deployment Daniel Minoli, 2010-11-17. Going beyond the technological building blocks of 3DTV. 3D Television: 3DTV Technology, Systems and Deployment. Rolling Out the Infrastructure for Next Generation Entertainment offers an early view of the deployment and rollout strategies of this emerging technology. It covers cutting-edge advances, theories and techniques in end-to-end 3DTV systems to provide a system-level view of the topic and what it takes to make this concept a commercial reality. The book reflects the full range of questions being posed about post-production 3D mastering, delivery options and home screens. It reviews fundamental visual concepts supporting stereographic perception of 3DTV and considers the various stages of a 3DTV system including capture, representation, coding, transmission and display. Presents new advances in 3DTV and display techniques. Includes a 24-page color insert. Identifies standardization activities critical to broad deployment. Examines a different stage of an end-to-end 3DTV system in each chapter. Considers the technical details related to 3DTV including compression and transmission technologies. Discussing theory and application, the text covers both stereoscopic and autostereoscopic techniques, the latter eliminating the need for special glasses and allowing for viewer movement. The book contains the results of a survey of a number of advocacy groups to provide a clear picture of the current state of the industry, research trends, future directions and underlying topics.

Global ICT Industry and Market Report: 2013 Edition MIC Research Team, 2016-08-01. The rigid economic conditions in 2012 stemming from the European debt crisis, slow recovery of mature economies and less expected growth in the emerging markets had caused government and enterprise sectors to cut down their spending and led to low consumer confidence. Improved broadband service quality and increased income per capita in emerging countries have made smart handheld devices and other consumer electronic devices the engine of growth for the ICT industry. This report profiles the development of motherboard, notebook, PC, including netbook, server, tablet, smartphone, large medium and small LCD panels, LCD TV and DSC Digital Still Camera in 2013 and examines their future trends beyond.
