The Blue Economy:

The Blue Economy Gunter A. Pauli, 2010 Dr Gunter Pauli is challenging the green movement he has been so much a part of to do better to do more He is the entrepreneur who launched Ecover those products are probably in many of your homes He built the largest ecologically sound factory in the world His participation in the Club of Rome and the founding of Zero Emissions Research Institute ZERI has made an immense contribution to sustainability both in terms of research public awareness and articulating a visionary direction He has dedicated himself to teaching and the hands on implementation of projects that have brought healthy environments good nutrition health care and jobs in sustainable commerce to a myriad of places in the world

Developing the Blue Economy Robert C. Brears, 2021-10-20 Traditionally the ocean economy is viewed solely as a mechanism for economic growth In this business as usual approach large scale industrial economies have developed the ocean economy through the exploitation of maritime and marine resources often without consideration of how those activities impact the future health or productivity of those same resources This has led to aquatic ecosystems being viewed and treated as limitless resources the marine environment becoming a dumping ground for waste overfishing diminishing fishing stocks ocean habitats being degraded from coastal developments sea level rise impacting coastal communities and infrastructure increasing ocean acidification and the marginalisation of poor coastal communities Recognising the failings of the traditional ocean economy there is a transition underway around the world towards the Blue Economy This concept moves beyond the business as usual approach with economic development and ocean health complementary to one another In the Blue Economy the environmental risks of and ecological degradation from economic activity are mitigated or significantly reduced Therefore economic activity is in balance with the long term capacity of the ocean ecosystems to support this activity and remain healthy and resilient This book will provide an overview of the various technologies used to promote cross sectoral and multi scalar collaboration facilitate the integrated management of sectors and resources foster partnerships between governments and industry encourage R D in new technologies in resource use and management and scale up innovative financing mechanisms in the development of a Blue Economy Also the book will contain in depth case studies that illustrate how locations of differing climates lifestyles and income levels have implemented technologies to facilitate the development of the Blue Economy

Developing the Blue Economy will provide an accessible resource for practitioners and researchers working in the field on the various innovative technologies being implemented around the world to create a Blue Economy

Tracing the Blue Economy Awni Behnam, 2013-11-02 Forming part of the Fondation de Malte s LUMEN Monograph Series in this text Dr Awni Behnam President of the International Ocean Institute and former Assistant Secretary General of the United Nations explores how we must live with the ocean and from the ocean in a sustainable relationship The interconnectedness of emerging global challenges is forcing a policy dimension change in the form of the Blue Economy as an integrated approach to the governance of the ocean and urban interface revolving

around the human dimension The paradigm shift came when Elisabeth Mann Borgese founder of the International Ocean Institute viewed the situation from the seaward side where a sustainable ocean economy integrates with and is inclusive of the Green Economy She famously stated if before you saw the sea and the sea floor as a continuation of the land you now see the land as a continuation of the sea the concept of the Blue Economy is an attempt to do justice to that genius vision

Preparing a Workforce for the New Blue Economy Liesl Hotaling, Richard W.
