The Japanese Self in Cultural Logic Takie Sugiyama Lebra,2004-09-30 The self serves as a universally available effective and indispensable filter for making sense of the chaos of the world In her latest book Takie Lebra attempts a new understanding of the Japanese self through her

unique use of cultural logic She begins by presenting and elaborating on two models opposition logic and contingency logic to examine concepts of self Japanese and otherwise Guided by these she delves into the three layers of the Japanese self focusing first on the social layer as located in four zones omote front uchi interior ura back and soto exterior and its shifts from zone to zone New light is shed on these familiar linguistic and spatial categories by introducing the dimension of civility The book expands the discussion in relation to larger constructions of the inner and cosmological self Unlike the social self which views itself in relation to the other the inner layer involves a reflexivity in which self communicates with self While the social self engages in dialogue or triologue the inner self communicates through monologue or soliloquy The cosmological layer which centers around transcendental beliefs and fantasies is examined and the analysis supplemented with comments on aesthetics Throughout Lebra applies her methodology to dozens of Japanese examples and makes relevant comparisons with North American culture and notions of self Finally she provides a spirited analysis of critiques of Nihonjinron to reinforce the relevancy of Japanese studies This volume is the culmination of decades of thinking on self and social relations by one of the most influential scholars in the field It will prove highly instructive to Japanese and non Japanese readers alike in a range of disciplines including anthropology sociology and social psychology Encyclopaedia of Occupational Health and Safety Jeanne Mager Stellman,1998 **Marketing Management** S.H.H.
