

A Library Journal "Best Reference"

HISTORY still waits to be discovered. In courthouses and warehouses, town halls and rectories, dusty attics and ancient trunks, old records exist in every form imaginable.

Technology delivers both treasures and challenges. Websites offer the relics of history through many delivery schemes. Audio files, podcasts, and webinars stream interpretations of the past. Libraries house film, reprints, revisions, and translations, alongside digital access to works published previously in print.

Yet, history is not just a collection of documents or "facts"—and all records are not created equal. Records simply offer evidence. Their assertions may or may not be true. To decide what actually happened, we must understand those records. To analyze that evidence and judge what to believe, we also need specific facts about those records themselves.

Students, mature scholars, and curious sleuths all face the same questions:

- What details must we capture for each type of source in order to understand it and properly interpret its evidence?
- How do we evaluate a record's credibility—especially when its information conflicts with assertions made in other sources?
- How do we identify each source—not just so it can be found again, but so we and others can make informed judgments about its reliability?

EVIDENCE EXPLAINED is the go-to guide for all who explore the past, guiding users through the maze of materials not covered by other citation manuals. Examples for every type of record cover the conundrums created by the diverse media now used to access historical records. EE's new and significantly revised fourth edition will teach you how to build clear citations for every kind of source and media, regardless of the quirks involved.
