a novel he's never heard of and see familiar ones with new eyes Mostly it will reaffirm literature's ability to distract and transport to resonate and reassure to change the way we see the world and our place in it This appealing and helpful read is guaranteed to double the length of a to read list and become a go to reference for those unsure of their reading identities or who are overwhelmed by the sheer number of books in the world Library Journal *Novel Science* Adelene

Buckland,2022-12-22 *Novel Science* is the first in depth study of the shocking groundbreaking and sometimes beautiful writings of the gentlemen of the heroic age of geology and of the contribution these men made to the literary culture of their day For these men literature was an essential part of the practice of science itself as important to their efforts as mapmaking fieldwork and observation The reading and writing of imaginative literatures helped them to discover imagine debate and give shape and meaning to millions of years of previously undiscovered earth history Borrowing from the historical fictions of Walter Scott and the poetry of Lord Byron they invented geology as a science discovered many of the creatures we now call the dinosaurs and were the first to unravel and map the sequence and structure of stratified rock As Adelene Buckland shows they did this by rejecting the grand narratives of older theories of the earth or of biblical cosmogony theirs would be a humble science faithfully recording minute details and leaving the big picture for future generations to paint Buckland also reveals how these scientists just as they had drawn inspiration from their literary predecessors gave Victorian realist novelists such as George Eliot Charles Kingsley and Charles Dickens a powerful language with which to create dark and disturbing ruptures in the too seductive sweep of story **The Female Body in Medicine and Literature** Andrew

Mangham,Greta Depledge,2013-08-15 Drawing on a range of texts from the seventeenth century to the present *The Female Body in Medicine and Literature* explores accounts of motherhood fertility and clinical procedures for what they have to tell us about the development of women's medicine The essays here offer nuanced historical analyses of subjects that have received little critical attention including the relationship between gynecology and psychology and the influence of popular art forms on so called women's science prior to the twenty first century Taken together these essays offer a wealth of insight into the medical treatment of women and will appeal to scholars in gender studies literature and the history of medicine

Bioethics and Biolaw through Literature Daniela Carpi,2011-10-27 In recent years the well established field of human anthropology has been put under scrutiny by the new data offered by science and technology Scientific intervention into human life through organ transplants euthanasia genetic engineering experiments connected to the genetic code and the genome and varied other biotechnologies have placed ethical beliefs into question and created ethical dilemmas These scientific inventions influence our views on birth and death on the construction of the body and its technical reproducibility and have problematized the concept of the human persona The purpose of bioethics the science of life is to find new values and norms which will be valid for a multicultural society Bioethics is today a well respected topic of research that has brought together philosophers and experts to discuss the limits of science and medicine The aim of this book is to merge the

two fields of bioethics and law or biolaw through the literary text by taking into consideration the transformations of the concept of persona at which we have nowadays arrived The new meaning of the term persona represents in fact the final point of a long standing quest for man's sense of his own being and human dignity and of his capacity to live in social interrelations The volume presents a wide range of perspectives comprising methodological approaches legal and literary aspects

The Feminine Middlebrow Novel, 1920s to 1950s Nicola Humble, 2001 The work of over thirty novelists is covered read alongside other discourses as diverse as cookery books child care manuals and the reports of Mass Observation Investigating the nature of the feminine middlebrow and its readers the author considers its variously radical and conservative remakings of ideas of class the home the family and gender

BOOK JACKET **Violent Women and Sensation Fiction** A. Mangham, 2015-12-11 This book explores ideas of violent femininity across generic and disciplinary boundaries during the nineteenth century It aims to highlight how medical legal and literary narratives shared notions of the volatile nature of women Mangham traces intersections between notorious legal trials theories of female insanity and sensation novels

Passion and Pathology in Victorian Fiction Jane Wood, 2001 Nervous illness and the study of how body and mind connected were of intense interest to Victorian medical writers and novelists alike This elegant study offers an integrated analysis of how medicine and literature figured the connection between the body and the mind Alongside detailed examinations of some of the era's most influential neurological and physiological theories Jane Wood offers fresh readings of fictions by Charlotte Brontë George MacDonald George Eliot Wilkie Collins Thomas Hardy and George Gissing

Metaphors of Change in the Language of Nineteenth-century Fiction Megan Perigoe Stitt, 1998 This book examines three major nineteenth century writers in the context of the models of progress emerging from contemporary studies in geology and language The deployment of varieties of speech in their novels throws light on how different genres fictional and scientific affected the century's use of metaphor and its often contradictory theories of progress

The Wasting Heroine in German Fiction by Women 1770-1914 Anna Richards, 2004 In this broad ranging study of German fiction by women between 1770 1914 the author aims to add a new dimension to existing debates on the association of women and illness in literature She constructs a history of women's self starvation eating behaviour and wasting diseases

Excitable Imaginations Kathleen Lubey, 2012-09-27 Excitable Imaginations offers a new approach to the history of pornography Looking beyond a counter canon of bawdy literature Kathleen Lubey identifies a vigilant attentiveness to sex across a wide spectrum of literary and philosophical texts in eighteenth century Britain Esteemed public modes of writing such as nationalist poetry moral fiction and empirical philosophy as well as scandalous and obscene writing persistently narrate erotic experiences desire voyeurism seduction orgasm The recurring turn to sexuality in literature and philosophy she argues allowed authors to recommend with great urgency how the risqué delights of reading might excite the imagination to ever greater degrees of educability on moral and aesthetic matters Moralists such as Samuel Richardson and Adam Smith like

their licentious counterparts Rochester Haywood and Cleland purposefully evoke salacious fantasy so that their audiences will recognize reading as an intellectual act that is premised on visceral pleasure. Eroticism in texts like *Pamela* and *Memoirs of a Woman of Pleasure* in Lubey's reading did not compete with instructive literary aims but rather was essential to the construction of the self-governing Enlightenment subject.

Romantic Autopsy Arden Hegele, 2022 This book considers a moment at the turn of the nineteenth century when literature and medicine seemed embattled in rivalry to find the fields collaborating to develop interpretive analogies that saw literary texts as organic bodies and anatomical features as legible texts.

Mary, A Fiction and The Wrongs of Woman, or Maria Mary Wollstonecraft, 2012-04-05 Mary Wollstonecraft wrote these two novellas at the beginning and end of her years of writing and political activism. Though written at different times, they explore some of the same issues: ideals of femininity as celebrated by the cult of sensibility, the unequal education of women and domestic subjugation. Mary counters the contemporary trend of weak emotional heroines with the story of an intelligent and creative young woman who educates herself through her close friendships with men and women. Darker and more overtly feminist, *The Wrongs of Woman* is set in an insane asylum where a young woman has been wrongly imprisoned by her husband. By presenting the novellas in light of such texts as Wollstonecraft's letters, her polemical and educational prose, similar works by other feminists and political reformists, the literature of sentiment and contemporary medical texts, this edition encourages an appreciation of the complexity and sophistication of Wollstonecraft's writing goals as a radical feminist in the 1790s.

The Politics of Irony in Thackeray's Mature Fiction Zelma Catalan, 2009

Victorian Automata Suzy Anger, Thomas Vranken, 2024-03-20 The relationship between lifelike machines and mechanistic human behaviour provoked both fascination and anxiety in Victorian culture. This collection is the first to examine the widespread cultural interest in automata, both human and mechanical, in the nineteenth century. It was in the Victorian period that industrialization first met information technology and that theories of physical and mental human automatism became essential to both scientific and popular understandings of thought and action. Bringing together essays by a multidisciplinary group of leading scholars, this volume explores what it means to be human in a scientific and industrial age. It also considers how Victorian inquiry and practices continue to shape current thought on race, creativity, mind and agency. This title is part of the Flip it Open programme and may also be available Open Access. Check our website Cambridge Core for details.

The Musical Crowd in English Fiction, 1840-1910 P. Weliver, 2006-09-05 This book provides insight into how musical performances contributed to emerging ideas about class and national identity. Offering a fresh reading of bestselling fictional works drawing upon crowd theory, climate theory, ethnology, science, music reviews and books by musicians to demonstrate how these discourses were mutually constitutive.

The Routledge Research Companion to Nineteenth-Century British Literature and Science John Holmes, Sharon Ruston, 2017-05-18 Tracing the continuities and trends in the complex relationship between literature and science in the long nineteenth century, this companion provides scholars with a

comprehensive authoritative and up to date foundation for research in this field In intellectual material and social terms the transformation undergone by Western culture over the period was unprecedented Many of these changes were grounded in the growth of science Yet science was not a cultural monolith then any more than it is now and its development was shaped by competing world views To cover the full range of literary engagements with science in the nineteenth century this companion consists of twenty seven chapters by experts in the field which explore crucial social and intellectual contexts for the interactions between literature and science how science affected different genres of writing and the importance of individual scientific disciplines and concepts within literary culture Each chapter has its own extensive bibliography The volume as a whole is rounded out with a synoptic introduction by the editors and an afterword by the eminent historian of nineteenth century science Bernard Lightman

The Routledge Companion to Literature and Science Bruce Clarke, Manuela Rossini, 2010-09-13 With forty four newly commissioned articles from an international cast of leading scholars The Routledge Companion to Literature and Science traces the network of connections among literature science technology mathematics and medicine Divided into three main sections this volume links diverse literatures to scientific disciplines from Artificial Intelligence to Thermodynamics surveys current theoretical and disciplinary approaches from Animal Studies to Semiotics traces the history and culture of literature and science from Greece and Rome to Postmodernism Ranging from classical origins and modern revolutions to current developments in cultural science studies and the posthumanities this indispensable volume offers a comprehensive resource for undergraduates postgraduates and researchers With authoritative accessible and succinct treatments of the sciences in their literary dimensions and cultural frameworks here is the essential guide to this vibrant area of study

The Cambridge Companion to Sensation Fiction Andrew Mangham, 2013-10-17 In 1859 the popular novelist Wilkie Collins wrote of a ghostly woman dressed from head to toe in white garments laying her cold thin hand on the shoulder of a young man as he walked home late one evening His novel The Woman in White became hugely successful and popularised a style of writing that came to be known as sensation fiction This Companion highlights the energy the impact and the inventiveness of the novels that were written in sensational style including the work of Mary Elizabeth Braddon Mrs Henry Wood and Florence Marryat It contains fifteen specially commissioned essays and includes a chronology and a guide to further reading Accessible yet rigorous this Companion questions what influenced the shape and texture of the sensation novel and what its repercussions were both in the nineteenth century and up to the present day
