Visual Experiences in Cinquecento Theatrical Spaces Jimena Berzal de Dios,2019-01-02 Through an interdisciplinary examination of sixteenth century theatre Visual Experiences in Cinquecento Theatrical Spaces studies the performative aspects of the early modern stage paying special attention to the overlooked complexities of audience experience Examining the period s philosophical and aesthetic ideas about space place and setting the book shows how artists consciously moved away from traditional representations of real spaces on stage instead providing their audiences with more imaginative and collaborative engagements that were untethered by strict definitions of naturalism In this way the book breaks with traditional interpretations of early modern staging techniques arguing that the goal of artists in this period was not to cater to a single privileged viewer through the creation of a naturalistically unified stage but instead to offer up a complex multimedia experience that would captivate a diverse assembly of theatre goers Props Eleanor Margolies,2017-09-16 This diverse book brings together theoretical and practical viewpoints on objects in performance how they can be part of theatre scenery equal partners in performance or autonomous things Through close analysis of specific performances Eleanor Margolies examines actor training scenography materials construction techniques and object theatre The text investigates a number of critical questions including what the difference is between a theatre prop and an everyday object how audiences respond to the various ways that props are used by actors and designers and whether devising with stuff affect the making process or the attitudes to materiality embodied in performance With discussions of papier m ch and collapsing chairs fake food and stage blood Props is an essential sourcebook for students practitioners and researchers of theatre design and prop making **Artificial Darkness** Noam M. Elcott,2016-05-30 This ambitious study explores how important darkness artificial darkness was as an actual technology in producing not just photographs but visual novelties and

experiments in cinema in the nineteenth century The study plays out against a backdrop of urban history where most scholars have focused on the growth of artificial light and the electrification of cities Elcott s study challenges that approach In considering zones of darkness it ranges from the sites of production darkrooms studios to those of reception theaters cinemas arcades that shaped modern media and perceptions He argues that in the nineteenth century the avant garde was often less interested in the filmed image than in everything surrounding it the screen the projected light the darkness the experience of disembodiment He argues that darkness has a history separate from night evil or the color black and has a specifically modern manifestation as a media technology We are all aware of the velvet light trap in photography but at the heart of this book are technologies of darkness crucial to cinema that were commonly known as the black screen but have over time faded from the storied discourse
