

A promotional poster for the Amazon Prime series 'Cross'. The central figure is Idris Elba, a Black man with a short beard, wearing a dark blue leather jacket. He is shown from the waist up, turned slightly away from the camera but looking back over his right shoulder with a serious expression. The back of his jacket has the word 'DETECTIVE' printed in large, white, sans-serif capital letters. A bright yellow diagonal banner cuts across the lower half of the image, featuring the word 'CROSS' in large, bold, black, sans-serif capital letters. The background is a dramatic, dark scene of a city at night, with the illuminated dome of the United States Capitol building visible on the left under a cloudy sky.

The Carbon Cross The Carbon Series Book 2:

Carbon: The Next Silicon? Marc J. Madou, Victor H. Perez-Gonzalez, Bidhan Pramanick, 2016-01-12 Nuclear Magnetic Resonance NMR and Electron Spin Resonance ESR spectroscopies are well known characterization techniques that reveal the molecular details of a sample non invasively The authors discuss how NMR can provide useful information on the microstructure of carbon and its surface properties and explain how C MEMS C NEMS technology can be explored for building improved NMR microdevices The authors highlight the manipulation of fluids and particles by dielectrophoresis and the use of carbon electrodes for dielectrophoresis in Lab on a Chip The use of these electrodes in sample preparation through electrical polarization of a sample for identification manipulation and lysis of bioparticles is also discussed and they introduce a new generation of neural prosthetics based on glassy carbon micromachined electrode arrays The tuning of the electrical electrochemical and mechanical properties of these patternable electrodes for applications in bio electrical signal recording and stimulation and results from in vivo testing of these glassy carbon microelectrode arrays is reported demonstrating a quantifiable superior performance compared to metal electrodes

Carbon Captured Matto Mildenerberger, 2020-02-18 A comparative examination of domestic climate politics that offers a theory for cross national differences in domestic climate policymaking Climate change threatens the planet and yet policy responses have varied widely across nations Some countries have undertaken ambitious programs to stave off climate disaster others have done little and still others have passed policies that were later rolled back In this book Matto Mildenerberger opens the black box of domestic climate politics examining policy making trajectories in several countries and offering a theoretical explanation for national differences in the climate policy process Mildenerberger introduces the concept of double representation when carbon polluters enjoy political representation on both the left through industrial unions fearful of job loss and the right through industrial business associations fighting policy costs and argues that different climate policy approaches can be explained by the interaction of climate policy preferences and domestic institutions He illustrates his theory with detailed histories of climate politics in Norway the United States and Australia along with briefer discussions of policies in Germany Japan the United Kingdom and Canada He shows that Norway systematically shielded politically connected industrial polluters from costs beginning with its pioneering carbon tax the United States after the failure of carbon reduction legislation finally acted on climate reform through a series of Obama administration executive actions and Australia's Labor and Green parties enacted an emissions trading scheme which was subsequently repealed by a conservative Liberal party government Ultimately Mildenerberger argues for the importance of political considerations in understanding the climate policymaking process and discusses possible future policy directions
