The Intention Economy When Customers Take Charge:

The Intention Economy Doc Searls, 2012 Maps out the implications of a customer driven business revolution that is flipping the paradigm of supply and demand and putting consumers in charge **Customer's New Voice** John S. McKean, 2014-09-12 Find out how to reap the benefits of motivating and engaging the new direct customer voice The Customer's New Voice shows businesses how to motivate and transform directly volunteered consumer knowledge into profitable insights enabling a new echelon of marketing relevancy customer experience and personalization With a deep look at the inner workings of how a modern generation of business innovators are tapping into the fresh opportunities with the customer's new voice this book describes how businesses are transforming inference based predictions of purchase intent with direct consumer knowledge of their actual intentions and buying context The result An untouchable unprecedented level of offer relevancy experience and personalized service levels Those offers range from the most basic app model of Give me your physical location we'll find the best Thai restaurant near you and give you an instant coupon to a more complex model such as an Electric utility value proposition We'll give you discounts to charge your Prius during certain times to help us optimize our grid efficiency while allowing Toyota to monitor and optimize your battery to enable Toyota's R however this type of data has less than 10 percent accuracy This low effectiveness also necessitates up to 70 percent of a business's cost infrastructure Direct consumer knowledge is now available and boasts up to 20-50 percent accuracy yet businesses remain anchored in the old indirect competencies This book helps companies integrate compelling sharing motivators and controls for consumers to feel motivated and safe about directly sharing their product and experience desires providing the ultimate market advantage Learn how to catch up to the new digitalized consumer Leverage direct consumer information from current megatrends Navigate privacy's current and future metamorphosis Unlock the untapped value of Big Data's true enabler Little Data Parsing incidentally volunteered data has been stagnant for decades due to the capabilities and expectations of a new generation of enabled consumers The timeless reality is that any level of investment in computing power data and analytics will never approach their full ROI potential without interfusing the direct intentional insights from the consumer If today's forward thinking companies want to profitably engage the new consumers they must learn the secrets of motivating and safeguarding this new potential of customer transparency The risks of not engaging these new consumer voices Irrelevancy and Silence The Customer's New Voice shows businesses how to fulfill the promise and caveat of the new consumer If you make my life easier reward me and respect my shared information I will tell you my secrets

Literacy Work in the Reign of Human Capital Evan Watkins, 2015-07-01 In recent years a number of books in the field of literacy research have addressed the experiences of literacy users or the multiple processes of learning literacy skills in a rapidly changing technological environment In contrast to these studies this book addresses the subjects of literacy In other

words it is about how literacy workers are subjected to the relations between new forms of labor and the concept of human capital as a dominant economic structure in the United States It is about how literacies become forms of value producing labor in everyday life both within and beyond the workplace itself As Evan Watkins shows apprehending the meaning of literacy work requires an understanding of how literacies have changed in relation to not only technology but also to labor capital and economics The emergence of new literacies has produced considerable debate over basic definitions as well as the complexities of gain and loss At the same time the visibility of these debates between advocates of old versus new literacies has obscured the development of more fundamental changes Most significantly Watkins argues it is no longer possible to represent human capital solely as the kind of long term resource that Gary Becker and other neoclassical economists have defined Like corporate inventory and business management practices human capital labor now also appears in a just in time form as if a power of action on the occasion rather than a capital asset in reserve Just in time human capital valorizes the expansion of choice but it depends absolutely on the invisible literacy work consigned to the peripheries of concentrated human capital In an economy wherein peoples attention begins to eclipse information as a primary commodity a small number of choices appear with an immensely magnified intensity while most others disappear entirely As Literacy Work in the Reign of Human Capital deftly illustrates the concentration of human labor in the digital age reinforces and extends a class division of winners on the inside of technological innovation and losers everywhere else

The Prospect of Labor in Cyberspace Zhuyuan Yang, 2024-11-27 This book explores user labor in the internet age offering innovative perspectives on digital labor It broadens the discussion on topics like technology and power the reproduction of network user labor labor relations in cyberspace economic rewards of network user labor and especially the non economic rewards of network user labor Specifically the book examines the impact of technology power and capital on network user labor the control exerted by media platforms over this labor and the payment methods for both economic and non economic rewards

Digitalization of Society and Socio-political Issues 2 Éric George, 2020-01-08 Digitalization is a long socio historic process in which all areas of societys activities are reconfigured In the first volume of Digitalization of Society and Socio political Issues there is an examination of the transformations linked to the development of digital platforms and social media which affect cultural and communicational industries The book also analyzes the formation of Big Data their algorithmic processing and the societal changes which result from them social monitoring and control in particular Through diverse critical reflections it equally presents different ways that digital participates in relations of power and domination and contributes to eventual emancipatory practices Following on the second volume examines the transformations that are linked to digital practices that affect the production circulation and consumption of information as well as new forms that are taken by social mobilizations It treats several important issues in the digital era that are more likely to become the subject of public debates among which one can include the renewed relationship between research and digital Through diverse critical

reflections it equally presents different ways that digital participates in relations of power and domination and contributes to eventual emancipatory practices

Data for the People Andreas Weigend, 2017-01-31 A long time chief data scientist at Amazon shows how open data can make everyone not just corporations richer Every time we Google something Facebook someone Uber somewhere or even just turn on a light we create data that businesses collect and use to make decisions about us In many ways this has improved our lives yet we as individuals do not benefit from this wealth of data as much as we could Moreover whether it is a bank evaluating our credit worthiness an insurance company determining our risk level or a potential employer deciding whether we get a job it is likely that this data will be used against us rather than for us In *Data for the People* Andreas Weigend draws on his years as a consultant for commerce education healthcare travel and finance companies to outline how Big Data can work better for all of us As of today how much we benefit from Big Data depends on how closely the interests of big companies align with our own Too often outdated standards of control and privacy force us into unfair contracts with data companies but it doesn't have to be this way Weigend makes a powerful argument that we need to take control of how our data is used to actually make it work for us Only then can we the people get back more from Big Data than we give it Big Data is here to stay Now is the time to find out how we can be empowered by it
