Industrial Policy and the World Trade Organization Sherzod Shadikhodjaev, 2018-11-08 The severe global financial crisis of 2008 could not be overcome without government interventions through industrial policy. This timely book analyses industrial policy from the perspectives of trade law and economics under the WTO system. The author expertly examines both general tools of protecting and supporting domestic producers and specific topics like special economic zones, localization, greening measures and creative economy. In addition to legal texts and jurisprudence this book extensively utilizes other WTO materials to show what is actually discussed in WTO meetings and forums on relevant issues. Where applicable the author advances practical recommendations for right or optimal industrial policy in certain contexts based on trade rules, case law and some countries' real experiences. The author concludes this work with some thoughts on concrete actions to be taken at the WTO and national levels and in academic circles in order to better tackle industrial policy issues.

Digital Trade and Data Privacy Roman Pascal Kalin, 2024-11-26 This monograph provides a comprehensive examination of the intricate legal challenges arising at the intersection of digital trade and data privacy It argues in favour of an integrated approach to understanding the dynamic interaction between digital trade and data privacy with the aim of building a bridge between these two fields of law Cross border data flows are paramount for the operational efficiency and productivity of companies across diverse industries The ongoing economic transformation characterized by the perception of data as both a commodity and currency exacerbates the tension between the push for economic liberalization of cross border transfers of personal data under a trade rationale and

the limitations imposed on such transfers for non economic reasons Given that the regulation of cross border personal data transfers is profoundly influenced by both international trade law and national data privacy laws a complex relationship has developed between the normative values that underpin these legal frameworks This publication centers on the resulting interdependence of digital trade and data privacy in a global digital economy It provides a contribution to the debate on a re contextualisation of trade law against the background of the advent of digital trade Coherence and Divergence in Services Trade Law Rhea Tamara Hoffmann,Markus Krajewski,2020-07-23 This book addresses topical questions concerning the legal framework of trade in services and assesses how these issues are dealt with in GATS and in selected preferential trade agreements In addition the chapters discuss whether the differences and similarities if any are evidence of greater coherence or greater divergence The book combines the individual analyses to provide a more comprehensive picture of the current law on services trade liberalisation A quarter of a century after the conclusion of the General Agreement on Trade and Services GATS international law on trade in services is still in a state of flux on the one hand countries increasingly conclude bilateral and regional trade agreements with sections on trade in services that aim at a further liberalisation of services trade On the other the GATS structure remains the dominant model and serves as the basis for many preferential trade agreements In addition new aspects such as electronic commerce data protection and taxation are now emerging while issues that had already manifested in the mid 1990s such as financial services regulation labour mobility and telecommunications continue to be problematic Usually the debates focus on the question of whether preferential trade agreements serve as a stepping stone or stumbling block for trade liberalisation at the multilateral level However it can be assumed that rules on trade in services in preferential trade agreements will coexist with the global GATS regime for the foreseeable future This raises the question of whether we re currently witnessing a drive towards greater coherence or more divergence in agreements on trade in services
