that impacts student achievement by cultivating self-reliant teachers who are continuously improving their practice. This method answers principals' key questions: Is the work of my teachers aligned with district curriculum? Are my teachers using research-based best practices? Are they choosing the instructional strategies that will promote student achievement?

The Faculty Mentor's Wisdom Raymond L. Calabrese, Page Smith, 2010-09-16. This book focuses on using faculty mentoring to empower doctoral students to successfully complete their doctoral studies. The book is a collection of mentoring chapters showcasing professors and dissertation advisors from the most prestigious universities in the United States. They provide an extraordinary range of mentoring advice that speaks directly to the doctoral student. Each chapter addresses a professional or personal component of the doctoral process that represents how these exceptional faculty best mentor their doctoral students. Faculty contributions exemplify diverse perspectives of mentoring: a. Some faculty are direct and forthright, pointing the mentee toward his/her destination; b. some faculty share personal experiences offering mentoring advice from the perspective of someone who traveled a similar path; and c. some faculty structure a dialogue between the faculty as mentor and you as the doctoral student. In all cases, they open possibilities for achieving success in doctoral studies. Students discover clues to follow during their doctoral journey. Whether the student is just beginning to think about entering a doctoral program, presently taking course studies under stress, and doesn't know what the future offers, this is an ideal book because it maps the entire doctoral process.

African American Perspectives on Leadership in Schools Lenoar Foster, Linda C. Tillman, 2009-11-16. This book fills an educational void in the school leadership literature as it relates to historical, theoretical, intellectual, and cultural understandings among those who prepare individuals for leadership in schools and for those who practice leadership in schools attended by significant numbers of African American students. Contributors to this volume are scholars whose research and service in schools have been important in understanding the historical, intellectual, and cultural traditions that facilitate and support effective leadership and in schools where African American school leaders, teachers, students, parents, and their communities of support construct effective and productive cultures of empowerment and achievement. It is these cultures that this volume addresses for their efficacy to support, empower, and sustain visible and measurable achievement among African American students.

Chinese Scholars on Western Ideas about Thinking, Leadership, Reform and Development in Education Sylvester Chen, Michael Kompf, 2012-12-24. This collection of papers by a group of Chinese educational administrators came about through a graduate study program that facilitated comparisons of educational practices from other cultures against the backdrop of globalization. Collaborative international programs allow contrast and comparisons of practices, policies, and educational principles but are not without barriers faced by candidates, which can include but are not limited to culture shock and communication and language adjustments. Comparisons of international educational institutions are telling when examined through transfer credit policies, degree recognition, institutional accreditation, and the value of academic credits in a globalized educational marketplace. China and Chinese

educators recognize that movement and take it most seriously as demonstrated by the group of educational ambassadors who have contributed a variety of perspectives and interests to this volume They are a new wave of thinkers whose studies embrace their native culture and open minds to alternative ways of understanding and acting on rapidly changing educational circumstances for learners teachers and administrators **Standards-Based Leadership** Sandra

Woodside, 2017-02-16 This book takes the reader

beyond net effects and main and interaction effects thinking and methods Complexity theory includes the tenet that recipes are more important than ingredients any one antecedent X condition is insufficient for a consistent outcome Y e.g. success or failure even though the presence of certain antecedents may be necessary A second tenet modeling contrarian cases is useful because a high or low score for any given antecedent condition X associates with a high Y low Y and is irrelevant for high low Y in some recipes in the same data set Third tenet equifinality happens several recipes indicate high low outcomes
