Kyle,2019-05-16 This book is an attempt to address two struggles for theistic educators e g those who approach their educational vocation from a religious perspective whether they are working in secular or faith based institutions The first struggle is that while numerous guidelines on teaching excellence have been compiled the resulting checklists can contain more than a hundred criteria to consider This book therefore identifies the evidence based guidelines that are likely to have the highest impact on student achievement thereby empowering educators to focus their efforts in more substantial ways The second struggle is related to the lack of resources which can help educators to view and approach their vocation from a theistic perspective While there are texts that discuss the relationship of spirituality and or theology to education few to date have sought to bring evidence based educational literature into dialogue with the western Christian tradition and thereby develop a bottom up theology of education This book addresses this historical and theological gap Overall this book is therefore intended to not only provide

theistic educators with high impact guidelines that can significantly improve the quality of education in their school systems but it also strives to do so from a thoroughly theistic perspective Occupational Therapy with Aging Adults - E-Book Karen Frank Barney, Margaret Perkinson, 2024-06-21 Get all the information you need to work holistically creatively and collaboratively when providing services for older adults with Karen Frank Barney Margaret A Perkinson and Debbie Laliberte Rudman s Occupational Therapy with Aging Adults 2nd Edition Emphasizing evidence based occupation based practice and a collaborative interdisciplinary approach this text walks students and practitioners through the full range of gerontological occupational therapy practice inclusive of working with individual clients to working at systems and societal levels Over 80 leaders in their respective topical areas contributed to the book s 33 chapters including the conceptual foundations and principles of gerontological occupational therapy bio psychosocial age related changes environmental forces shaping occupational participation for older adults the continuum of health care as well as implications for communities and the attributes ethical responsibilities and roles involved in gerontological occupational therapy This edition also covers topical OT issues that are crucially important to an aging population such as diversity and inclusion disability and aging sexuality technology telehealth and virtual environments intergenerational connections updates on dementia research and caring for someone with dementia occupational justice and aging age inclusive communities and an expanded section on hearing to ensure your students are well versed in every aspect of this key practice area UNIQUE Intraprofessional and interprofessional approach to intervention emphasizes working holistically and collaboratively in serving older adults UNIQUE Chapter on the wide range of physiological musculoskeletal and neurological changes among the aging patient population highlights related occupational performance issues Case examples help you learn to apply new information to actual client and community situations Chapter on evidence based practice discusses how to incorporate evidence into clinical or community settings Questions at the end of each chapter can be used for discussion or other learning applications UNIQUE Chapters on nutrition food insecurity and oral health explore related challenges faced by older adults Chapter on ethics provides a deeper understanding of how to address challenging ethical dilemmas **The Gospel of Climate**

Skepticism Robin Globus Veldman, 2019-10-22 Why are white evangelicals the most skeptical major religious group in America regarding climate change Previous scholarship has pointed to cognitive factors such as conservative politics anti science attitudes aversion to big government and theology Drawing on qualitative fieldwork The Gospel of Climate Skepticism reveals the extent to which climate skepticism and anti environmentalism have in fact become embedded in the social world of many conservative evangelicals Rejecting the common assumption that evangelicals skepticism is simply a side effect of political or theological conservatism the book further shows that between 2006 and 2015 leaders and pundits associated with the Christian Right widely promoted skepticism as the biblical position on climate change The Gospel of Climate Skepticism offers a compelling portrait of how during a critical period of recent history political and religious

interests intersected to prevent evangelicals from offering a unified voice in support of legislative action to address climate change

Territorial Landscapes Solutions for Sustainable Energy and Food Security Mourad Amer, Mohamed El Kaftangui, Ibrahim El-Sayed Maarouf, Nauman Khalid, Sharul Sham Bin Dol, 2025-07-09 This book introduces a model for the built environment designed to incorporate sustainability at every level. It emphasizes the integration of environmental, social, and economic factors to create resilient urban spaces. Also, it presents a decision support system that optimizes energy management for sustainability, enabling real-time adjustments and reducing carbon footprints. It discusses innovative strategies for managing water and wastewater in swampland areas, offering insights from UIN Raden Fatah Palembang's adaptation efforts. Also, this book provides a thorough review of bio-based business models, examining their agility and adaptability in fostering sustainable innovations that respond to market and environmental changes. Moreover, the book explores a novel approach to renewable energy; this chapter assesses the feasibility of using vortex bladeless wind turbines for energy generation at airport runways, offering both conceptual and economic analyses. In addition, it discusses the creation and role of multi-actor forums in promoting a sustainable blue economy in the Black Sea region, emphasizing collaborative efforts to preserve marine resources. This book investigates the use of halophyte biochar as a sustainable soil amendment for sandy soils, demonstrating its potential to improve soil quality and promote sustainable agriculture. Also, the book aims to assess the sustainability of food, energy, and water systems at the household level, advocating for integrated solutions that enhance resource efficiency and sustainability. This book delves into societal perceptions of climate change adaptation using interaction analysis to better understand public attitudes and their implications for policy and communication strategies. This book presents a case study from Istanbul, offering insights into how local identity can strengthen community resilience and sustainability efforts. Finally, the book provides a comprehensive guide to understanding and implementing sustainable practices across various sectors, from energy management and water resources to food systems and environmental education. It emphasizes the importance of interdisciplinary approaches and innovation agility in addressing global sustainability challenges.
