Organizational Cultures of Remembrance Daniel Mai,2015-05-19 In a business world predominantly oriented toward the future it has paradoxically become ever more common that companies turn towards their pasts This book empirically explores the phenomenon of organizational remembrance from a holistic cultural perspective Based on a twelve month ethnographic case study conducted at the headquarters of the German automobile company AUDI AG this study dissects the relationships between memory identity and image in a corporate setting The greater aim in doing so is twofold First this study examines exactly why and how a company officially manages its past in terms of history and tradition And

second this study scrutinizes what effect organizational remembrance has on the workforce how it impacts their collective identification with a corporate community and influences their understanding of their daily working life By investigating the interplay between different stakeholder groups as well as their practices media mental models and other vehicles of remembrance an integrated account is offered which makes sense of the complex cultural forces at work in the corporate handling of the past the present and the future

Machine Learning Toolbox for Social Scientists Yigit Aydede,2023-09-22

Machine Learning Toolbox for Social Scientists covers predictive methods with complementary statistical tools that make it mostly self contained The inferential statistics is the traditional framework for most data analytics courses in social science and business fields especially in Economics and Finance The new organization that this book offers goes beyond standard machine learning code applications providing intuitive backgrounds for new predictive methods that social science and business students can follow The book also adds many other modern statistical tools complementary to predictive methods that cannot be easily found in econometrics textbooks nonparametric methods data exploration with predictive models penalized regressions model selection with sparsity dimension reduction methods nonparametric time series predictions graphical network analysis algorithmic optimization methods classification with imbalanced data and many others This book is targeted at students and researchers who have no advanced statistical background but instead coming from the tradition of inferential statistics The modern statistical methods the book provides allows it to be effectively used in teaching in the social science and business fields

Key Features The book is structured for those who have been trained in a traditional statistics curriculum There is one long initial section that covers the differences in estimation and prediction for people trained for causal analysis The book develops a background framework for Machine learning applications from Nonparametric methods SVM and NN simple enough without too much detail It s self sufficient Nonparametric time series predictions are new and covered in a separate section Additional sections are added Penalized Regressions Dimension Reduction Methods and Graphical Methods have been increasing in their popularity in social sciences
