

4-In-1 A/V Selector with S-Video Conversion

15-1976

! IMPORTANT !

If an icon appears at the end of a paragraph, go to the box on that page with the corresponding icon for pertinent information.

⚠ — Warning

⚡ — Caution

✓ — Note

! — Important

💡 — Hint

! IMPORTANT !

You can set the selector on almost any flat surface. For the best results, do not place it on top of a TV or other electrical appliance.

If you place the selector on top of your TV, electromagnetic interference from the TV might distort the sound from any devices connected to the selector. If this happens, move the selector away from the TV.

⚡ CAUTIONS ⚡

- Do not connect the device's video output to both **INPUT V** (1–4) and **S-VIDEO INPUT** (1–4).
- Do not connect the TV or monitor's video input to both **OUTPUT V** and **OUTPUT S-VIDEO**.

Your RadioShack 4-In-1 A/V Selector with S-Video Conversion lets you connect up to four audio/video devices (such as direct-to-home satellite systems, VCRs, DVD players, laserdisc players, cable boxes, or video game systems) to a single TV and sound system. You can connect S-Video cables directly to the selector for optimum picture quality.

Four Audio/Video Inputs — let you connect up to four audio/video devices.

One Audio/Video Output — connects the devices to a TV.

Built-in Composite/S-Video Composite Circuit — lets you convert composite video (RCA) to S-Video, or S-Video to composite video.

Easy Push-Button Selector Switch — lets you quickly select the input source.

CONNECTIONS

Use stereo audio/video cables with RCA-type plugs (available at your local RadioShack store, or on the web at RadioShack.com) to make all connections. For the best performance, use high-quality audio/video cables. Do not use audio cables for video. The selector's color-coded jacks make it easy to connect devices to the selector. Yellow jacks are for video, red jacks are for right audio, and white jacks are for left audio.

Connect the sound outputs for each device to a set of **INPUT R/L** (1–4) jacks on the back of the selector.

If a device does not have an S-Video cable, connect its video output to **INPUT V** (1–4) for that device on the back of the selector.

If the device has an S-Video cable, connect it to the S-VIDEO S-VIDEO INPUT (1–4) jack for that device on the back of the selector.

If the TV or monitor does not have an S-Video cable, connect its video input to **OUTPUT V** on the back of the selector.

If it has an S-Video cable, connect it to the selector's **OUTPUT S-VIDEO**.

Connect the TV or monitor audio inputs to the selector's **OUTPUT R/L**.
