Review of Thoracic Imaging

WORD WIZARD

Complete the following paragraph by writing the correct term(s) in the spaces provided. You have been provided with part of the word to help you on your way.

The chest x-ray, or as it is more commonly called, a chest film or x-ray, is one of the most common methods for evaluating the lungs and other structures in the thorax. Air-filled lung tissue appears mostly dark on the film because it is easily penetrated by x-rays. We describe this effect by saying the tissue is radiolucent. The dense bone tissue of ribs appears white. Dense matter that is not easily penetrated is referred to as radiopaque. Fat is dense so it appears whiter than air or tissues. A female patient's breast tissue will alter the appearance of film. Obesity has the same effect. Soft tissues such as blood vessels appear more grayish because they have an intermediate density.

Abnormal conditions may be spotted through observation of certain densities in the wrong location. Accumulation of fluid in the pleural space, or pneumothorax, appears white and may obscure the angle where the ribs meet the diaphragm. If pus collects in the pleura, we call it empyema. Alveoli appear white when filled with pus or blood. On the chest film these white areas are called pulmonary effusion. If alveoli are filled with fluid but the airways around them are open, you will see air bronchograms that may indicate pneumonia. Air in the pleural space, or a pneumothorax, is another example of an abnormal density. This condition appears as a black area with none of the usual grayish markings of blood vessels in the lung tissue.

OVERVIEW

1. Describe the four tissue densities you can see on a chest radiograph.

- Air: Air, stomach, or intestines absorb very few x-rays appearing virtually black
- Fat: Fat absorbs a small amount and appears light gray
- Tissue: Tissue absorbs slightly more and appears medium gray
- Bone: Bone absorbs the most rays and appears white

8 Degrees of Yes Truth T. Akins, Ed. D., 2022-08-05. This book is my story, perception, experiences and manifestation based on my willingness to forgive and no longer define myself as a victim of circumstances. God gives that which is good when we seek to follow the good path. It is verified in the Psalm of David: Mercy and truth have met together; Righteousness and peace have kissed. Truth shall spring out of the earth. And righteousness shall look down from heaven. Yes, the Lord will give what is good. And our land will yield its increase. Righteousness will go before Him. And shall make His footsteps our pathway. Psalm 85:10-13. We all have domination over our choice to live life at a higher frequency. The fundamental elements of transformation are perception, experiences and manifestation. Our view of life shapes our desire to live our life to the fullest. Perception shapes our degree of saying yes to life. Reflection allows us to recognize, forgive and let go to shift our present view of life to a higher vibration. The higher vibration creates a higher degree of desire to live and let life unfold. Life events are lessons or blessings that shape our journey. Storytelling is adding the sequence and details to our experiences to understand. Sharing those stories with others builds collective hope to change unjust conditions or become a better person. Transformation is seen in the manifestation of our life structures. We see shifts in our financial, egoistic, livelihood, health, spiritual beliefs, world views, community and relationships. We grow stronger in who we are and become beneficial to the community by giving the gift that our soul came to give. We say yes to life at a higher level and create more happiness and fulfillment in our lives. This is transformation and this is the 8 Degrees of Yes.

Wight,2021-07-15 In *Oil Money* David M Wight offers a new framework for understanding the course of Middle East US relations during the 1970s and 1980s the transformation of the US global empire by Middle East petrodollars During these two decades American Arab and Iranian elites reconstituted the primary role of the Middle East within the global system of US power from a supplier of cheap crude oil to a source of abundant petrodollars the revenues earned from the export of oil In the 1970s the United States and allied monarchies including the House of Pahlavi in Iran and the House of Saud in Saudi Arabia utilized petrodollars to undertake myriad joint initiatives for mutual economic and geopolitical benefit These petrodollar projects were often unprecedented in scope and included multibillion dollar development projects arms sales purchases of US Treasury securities and funds for the mujahedin in Afghanistan Although petrodollar ties often augmented the power of the United States and its Middle East allies Wight argues they also fostered economic disruptions and state sponsored violence that drove many Americans Arabs and Iranians to resist Middle East US interdependence most dramatically during the Iranian Revolution of 1979 Deftly integrating diplomatic transnational economic and cultural analysis Wight utilizes extensive declassified records from the Nixon Ford

Carter and Reagan administrations the IMF the World Bank Saddam Hussein's regime and private collections to make plain the political economy of US power Oil Money is an expansive yet judicious investigation of the wide ranging and contradictory effects of petrodollars on Middle East US relations and the geopolitics of globalization
