

Water Systems Workbook

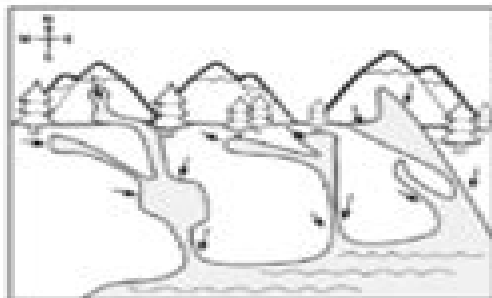

Name _____ Date _____

WATERSHEDS

No matter where you are on Earth, you are always standing on a watershed. A **watershed** is an area of land that is designated as such because all water collects in the same place (e.g. a river). There are two main types of watersheds: open and closed. An **open watershed** eventually drains into the ocean, while water in a **closed watershed** can only escape by evaporation or becoming groundwater. Most watersheds in Canada are open. Toronto contains seven river watersheds that drain into Lake Ontario. Lake Ontario is part of a larger watershed called the Great Lakes Basin watershed, which includes all five Great Lakes in North America.

A **watershed** is an area of land where all water collects in the same place (e.g. a river).

Watersheds are important for understanding water pollution. Since all water in a watershed eventually flows into the same body of water, water that is contaminated in any part of the watershed will affect all other areas downstream.

On the map on the left, look at the flow of water and circle areas to identify different watersheds.

Make sure all parts of a watershed.

Colour the watersheds in different colours.

How many watersheds did you identify?

Date _____

GROUNDWATER

Just under the ground, within soil and rock, an aquifer lies at the spaces between sediment, like sand, silty, or saturated with water. The depth at which layers of gravelly sediment with water is called the **water table**. Fluctuations (rise and fall) due to a number of factors. The water table is called the **unconfined zone** when the sediment is filled with oxygen and water.

An **unconfined aquifer**, is the zone beneath the water table that is saturated with water.

The zone beneath the water table that is saturated with water.

the diagram on the left shows the fluctuation between the summer and winter water tables. It also shows an aquifer (the saturated zone that stays filled with groundwater all year long).

Diagram above. Describe what happens to this river
