Linguistic Corpora and Big Data in Spanish and Portuguese Miguel Calderón Campos, Gael Vaamonde, 2024-10-21 In recent decades corpus linguistics has experienced tremendous development in the Hispanic world along two opposite but complementary approaches increase in corpus size corpus linguistics as Big Data and improvement in document selection and data annotation corpus linguistics as High Quality Data The first approach has led to the creation of massive corpora such as EsTenTen at the same time it has promoted the use of the web and social networks as corpora The second perspective gives rise to specialized corpora such as Post Scriptum or Oralia Diacrónica del español ODE The contributions gathered in this volume combine both methods in order to exploit their advantages and to overcome their possible limitations On the one hand it addresses the creation and design of small corpora focused on data quality on the other hand it offers case studies that make use of both specialized corpora and massive data extracted from the web Highlighting the complementary nature of both methods is the main idea of this book
