Managing Growth Simulation

Introduction

The complete course has revealed us the great idea, to influence our trends and intelligence while analyzing the entire details of Sunflower Nutraceuticals (SNC) company followed with all the decisions of the company which tends to increase their working capital and maximizing the overall organizational growth potentially with respect to time, as we have figured out the data and change in numbers below which reflects the growth annually. Moreover in addition to various details of the SNC firm we have also examined various decisions which took place in each of the phase of SNC's simulation which has an estimated values to figure out the results, secondly the paper also describes how SNC's decisions are influenced with respect to their working capital followed with the final step of evaluating the general affects associated with the limited access of financial mo.

Sunflower Nutraceuticals (SNC) Background

No wonder SNC is a privately owned Nutraceuticals company, more over one can say it is a wide distributor which provides all the vital dietary supplements such as herbs for women's, vitamins, and minerals for all the consumers (mainly women's), distributors and retailers. (Harvard Business School Publishing, 2012). Once the business was initiated after 2006, SNC expanded their operations and came up with various retail outlets in the nutraceutical industry and moreover has been successful while introducing their own brands of sports drinks, vitamins for teenagers, metabolism-boosting powders, etc and various other products from a same product line which enable to enhance the metabolism system of humans.

Although being potential to grow as one of the major nutraceutical distributors in the, they are still struggling to break even and one more than one occasion have been forced to exceed the company's credit line (\$1,00,000) to finance their payroll and other operational needs. Because of their somewhat restrictive financing options, they are only able to use a small percentage (approx. 10%) to evaluate and invest in new business expansion which resembles great opportunities in other retail markets across the globe.

Phase 1 of SNC's Simulation (Years 2013-2015)

During the initial phase of the simulation, they presented four major opportunities which could be helpful for their company to maximize their growth, those opportunities includes-

- i. **Discontinuing their Poorer Selling Nutraceutical Products** – since they have more than 100 products, some of those products can be dropped off SNC's inventory because they are outdated. Reducing or discounting those items will allow SNC to a) reduce its DSI to approximately 3-months, b) cut its EBIT by 50k approximately, c) drop sales to 1mm, and d) create more inventory space for the popular products. Doing this will rationalize the SNC's SKU count.
- ii. **Leveraging their Supplier Discount** – SNC is considering an offer to add Atlantic Wellness (a large successful food chain) to their nutraceutical product line. The company considered and accepted the Atlantic Wellness contract as it allows them to increase company sales almost doubled for 2mm, in addition to their contract offer with Atlantic Wellness, SNC also considered the acceptance of Ayurveda Naturals with the contract offer which was favorable to SNC as if payment terms reflected a net gain of approximately 50. They could have lower its AP if it was related to pay of Ayurveda Naturals within a month and that payment can rise a discount of almost 2% on some of their raw materials.
- iii. **Acquiring a New Client** – SNC acquired a new client by acquiring the services of health food giant Atlantic Wellness to their nutraceutical products line. This decision increased SNC's EBIT by approximately 200,000 and thus their sales figures by 4mm.

Russia and Eurasia at the Crossroads Egor S. Stroeve, Leonid S. Bliakhman, Mikhail I. Krotov, 2012-12-06 This last century of the second millennium has compressed human history to such an extent that whole ages of engineering economics social politics and the humanities have been accommodated in decades or even years Mankind has matured and applied its cognitive and creative genes to advance science and to internationalise future goals including the vital goal of sustainable social development However having no control over the new pace of history twentieth century civilisation has faced global cataclysms of a frequency and depth unprecedented and inconceivable in the past millennia Among the recent crises to be resolved in the third millennium is disintegration of the Soviet Union the biggest state and third largest population in the world Regretfully the pace of change in the Soviet Union had been slower than the

rates of reform elsewhere Attempts at economic redecorating instead of radical market oriented reforms failed In Soviet society general discontent with the progress of perestroika in the 1980s provoked the child complacency syndrome that is typical of a young mind contemptuous of any adult action it is convinced that things could have been done much better and much quicker With the new millennium approaching the Soviet Union gave way to 15 new states ridden with both inherited and acquired economic political and social maladies It is common knowledge however that childhood epidemics are short lived
