Differentiated Instruction for the Middle School Math Teacher Karen E. D'Amico, Kate Gallaway, 2008-01-02

Differentiated Instruction for the Middle School Math Teacher is a practical and easy to use resource for teaching a standards based math curriculum to all learners. It gives you effective ways to present math concepts, shows how to provide opportunities for guided practice and offers ideas for modifying the material to provide access to the same content standard for all students in the inclusive classroom. This book also contains key strategies for collaborating with other professionals, suggestions for involving the students' families by tying math concepts to students' everyday lives and valuable assessment strategies. The lessons in the book cover middle school math topics correlated to the standards of the National Council of Teachers of Math, ranging from numbers and operations to problem solving and reasoning. Each lesson includes instructions for presenting the lesson to the whole class, worksheets designed to help review and reinforce the concepts presented in each lesson, a section on how to adapt the lesson for the inclusive classroom including descriptions of different stations for different learners, a home school connection with family based everyday math activities, suggestions for how to assess students' grasp of the concepts presented in the lesson.

Potholes in My Lawn Kenny Attaway, 2010-10

Potholes in my lawn: the book finally was inspired by the wonderful children I had the honor of producing 50 minute groups for for the last five years of my life. The 50 minute therapeutic groups were supposed to be quick, brief and to the point, discussing the client's day to day feelings, but of course things like that get dull quickly for young troubled youth behaviorally and emotionally and for the child at heart therapist who's in charge of planning, running and illustrating the groups. Over the course of the last five years I have planned, implemented and conducted over 700 groups and some were beautiful, some confusing but all were fun and a learning experience. As time passed my understanding of a troubled youth's wants and needs became more understandable. Finally I understood: rarely does a child want to discuss problems on a Monday morning; they would much rather talk about their weekend and how much fun it was or should have been; rarely does a child want to hug and greet a person whom he or she just met. I learned through the course of time that yes, they want the world to know that they have been hurt, betrayed, misunderstood, misguided, but that they still want love. They want to drive over and pass their potholes on the road to success. Over the last five years I've learned enough to write ten books or more on giving therapeutic groups alone, but instead I settled on giving you 182 of the best, most favorite and most needed groups for a complete school year of an average 182 day school year, but the groups were designed to be used at any setting, place for the help and assistance with adolescents and teens. Many of the most prized groups I thought of keeping a secret from the rest of the world, but then thought if the groups were that much of a benefit for the CARE clients, children, that maybe they could possibly aid and assist the other million plus troubled youth of the world and the facilitators that sometimes run out of ideas like I did on many occasions. The groups of potholes in my lawn were not only rated the best and most favorite from the clients but through

therapeutic observations of the 700 groups the groups that were presented were the most effective in helping to change lives

Teaching Mathematics through Problem-Solving in K-12 Classrooms Matthew Oldridge, 2018-10-31 Teaching through problem solving is a commonly used phrase for mathematics educators This book shows how to use worthwhile and interesting mathematics tasks and problems to build a classroom culture based on students reasoning and thinking It develops a set of axioms about problem solving classrooms to show teachers that mathematics is playful and engaging It presents an aspirational vision for school mathematics one which all teachers can bring into being in their classrooms

The Leverage of National Board Candidacy Jana Hunzicker, 2006-12 The Leverage of National Board Candidacy is written for teachers considering the pursuit of National Board certification as well as for those currently engaged in the certification process Capturing the experiences of Anne Barbara and Jamie three teachers who sought NBPTS certification during the 2004 2005 school year the book vividly describes their teaching practices guiding philosophies and thought processes before exploring each teacher s learning as it occurred during the certification year Comparing the three teachers certification experiences to the findings of recently conducted research the book explores characteristics of readiness for National Board candidacy common learning outcomes of the NBPTS certification process and possible explanations for the varying nature and degree of learning that occurred for the three teachers through the experience The final chapter presents the theory of leverage during National Board candidacy an interactive dynamic that creates an uncomfortable yet positive pressure that makes the pursuit of National Board certification one of the most powerful professional development experiences currently available to teachers
