Sustainability of Agricultural Environment in Egypt: Part I Abdelazim M. Negm, Mohamed Abuhashim, 2018-11-11 This volume discusses the sustainability of Egypt's agriculture and the challenges involved. It provides a comprehensive review and the latest research findings and covers a variety of topics under the following themes: Applicability of sustainable agriculture in Egypt; Sustainable agriculture under water scarcity and polluted soil environments; Improved crop productivity using a variety of tried and tested procedures; Biotechnology application for agricultural sustainability and food security; Potentiality of soil sensing for a more sustainable agricultural environment. The volume closes with a summary of the key conclusions and recommendations from all chapters. Together with the companion volume *Sustainability of Agricultural Environment in Egypt Part II* it offers an essential source of information for postgraduate students, researchers and stakeholders alike.

Precision agriculture '09 E.J. van Henten, D. Goense, C. Lokhorst, 2023-09-04 Precision Agriculture is becoming ever more relevant as the agricultural industry struggles to come to terms with the environment, economics, traceability, vehicle guidance and crop management. Whilst some benefits have proved elusive, others contribute positively to today's agriculture. Research continues to be necessary and needs to be reported and disseminated to a wide audience. These proceedings contain the reviewed papers from the 7th European Conference on Precision Agriculture. The papers reflect the wide range of disciplines that impinge upon precision agriculture, including remote sensing, plant disease and weed detection, yield monitoring, soil sensing, geo statistics and path planning, regional and crop modelling, cooperation and guidance of robots, precision application, ICT in precision agriculture, future farming and European relevance for precision agriculture. The broad range of research topics reported is a valuable resource for researchers, advisors, teachers and professionals in agriculture. Also note that the reviewed papers from the 4th European Conference on Precision Livestock Farming are presented in a companion publication.

Sensors in Agriculture Dimitrios Moshou, 2019-06-12 Agriculture requires technical solutions for increasing production while lessening environmental impact by reducing the application of agro chemicals and increasing the use of environmentally friendly management practices. A benefit of this is the reduction of production costs. Sensor technologies produce tools to achieve the abovementioned goals. The explosive technological advances and developments in recent years have enormously facilitated the attainment of these objectives, removing many barriers for their implementation, including the reservations expressed by farmers. Precision agriculture and smart farming are emerging areas.

where sensor based technologies play an important role Farmers researchers and technical manufacturers are joining their efforts to find efficient solutions improvements in production and reductions in costs This book brings together recent research and developments concerning novel sensors and their applications in agriculture Sensors in agriculture are based on the requirements of farmers according to the farming operations that need to be addressed *Ag Professional* ,2006
