Ski ,2002-02 *Let Your Money Work Harder for You* Jim Gentile,2013-11-19 *Let Your Money Work Harder for You* A Roadmap to Financial Security is Jim Gentile's second start out of the author's gate and veers away from racetracks and into financial markets. This time around he relies on his degree in finance and years of investment experience to expound on the basics for obtaining a secure financial future. The goal of *Let Your Money Work Harder for You* is to breakdown monetary myths, simplify the investment process and direct the reader onto a path for planning a financial strategy. While sharing some personal experiences, Gentile also charts historical fiscal data and explains the real effect on investors young and old. Readers will learn that by simply starting as early as possible and changing some spending habits they can significantly alter their financial outlook. Included are several relatable examples to help plot a course that meets individual needs. Readers are encouraged to immerse themselves in each chapter and determine its relevance to their specific journey. Getting a better understanding of the long term effects of compounding interest on investments is only one of many financial issues covered in this excellent resource. Remember it's never too early or too late to help your money work harder for you. *Autocar* ,2004

Chintrepreneurship or Shanzhai Model Jiangning Zhao,2023-04-03 Theoretically the formational and developmental mechanism of Shanzhai Model, the Chintrepreneurship, the China way of Doing Business, theorized in this text in addition to complying with the traditionally Western dominated frameworks of risk taking oriented, technology oriented, resource oriented and speculation oriented, also creates the peculiar or updated characteristics complementary and supplementary to the existing theories of entrepreneurship and strategic management. The peculiar characteristics of Shanzhai Model may be attributed to the government policy guidance from macroeconomic level to technology development level and to market expansion level through the regulated cycle process of CCP government Five Year Plan. Such a dynamic process of government policy system determines the dynamisms of China economy, industry and enterprises, linking the previous weaknesses into the upgrade or rectification of the next five year plan, forcing enterprises to obligately upgrade or adjust their business and management operations given the absolute autocracy of China government. Practically, the imitation based cost saving operations on the enterprise level, the Wolf Like clustered industry chain operations organized by the principle of Risks Resources Benefits Sharing on the industry level and the Price to Performance products advantages on the market level together they have been contributing to the leapfrog of China economy by taking advantages of increasingly globalized business environment and the network Internet information technology system turning China into an economic Shanzhai, corruption Shanzhai and a political Shanzhai imposing the One Belt One Road hegemonism on the harmony of international community. Is it too late? The contribution of this text material may benefit MBA Ph D students in management and especially benefiting to those corporate executives. Regardless of De Globalization or De China campaigns, the flow of business is inevitably and eternally beyond the boundaries of countries, one way or another, sooner or later.
