Life After Privatization Raj S. Chari, 2015 *Life After Privatization* offers a refreshing and original theoretical conceptualization of what happened to state-owned enterprises after they were privatized from the late 1970s onwards Some privatized firms have become today's European and global giants Alphas merging with or acquiring other firms whereas other firms Betas have been taken over by Alphas or other sectoral leaders The book raises questions such as which privatized firms in the airline automobile and the electricity sectors in the UK France Germany Italy and Spain are Alphas and Betas today And why Building on a variety of themes from both Political Science and Business Studies it considers a comprehensive set of explanations both internal and external to the firm to analyse why a firm may become an Alpha or a Beta The evidence shows that while internal factors are important the more external political factors are necessary and sufficient to explain why a firm becomes an Alpha or a Beta This includes the impact of liberalization the roles of states and

the actions of regulators that are lobbied by firms Based on exhaustive evidence Life After Privatization concludes with a novel inductive theory which offers a significant step forward for social science scholars and practitioners understanding of the politics businesses face in global markets

Using the Google Places API and Google Trends Data to Develop High Frequency Indicators of Economic Activity Mr. Paul A Austin,Paul Austin,Mr. Marco Marini,Alberto Sanchez,Chima Simpson-Bell,James Tebrake,2021-12-17 As the pandemic heightened policymakers demand for more frequent and timely indicators to assess economic activities traditional data collection and compilation methods to produce official indicators are falling short triggering stronger interest in real time data to provide early signals of turning points in economic activity In this paper we examine how data extracted from the Google Places API and Google Trends can be used to develop high frequency indicators aligned to the statistical concepts classifications and definitions used in producing official measures The approach is illustrated by use of Google data derived indicators that predict well the GDP trajectories of selected countries during the early stage of COVID 19 To this end we developed a methodological toolkit for national compilers interested in using Google data to enhance the timeliness and frequency of economic indicators
