

CONFIGURING THE DEVICE

Use the instructions below to start the Initial Configuration Wizard (ICW), which helps you to configure the device to protect your network.

Step 1

Launch a browser. In the URL address field, enter **https://192.168.1.1**. The Rapid Deployment Wizard window appears.

Step 2

Login to the WebUI. The default admin name is **netcreen**, and the default admin password is **netcreen**.

Note: You can access the ICW from the Ethernet port 0/0, which is bound to the Trust security zone.

Step 3

If your network uses Juniper Networks NetScreen-Security Manager, you can use a Rapid Deployment configlet to automatically configure the device. Obtain a configlet from your NetScreen-Security Manager administrator, select **Yes**, select **Load Configlet from:**, browse to the file location, then click **Next**. The configlet sets up the device for you.

If you want to bypass the configuration wizard and go directly to the WebUI, select the last option, then click **Next**.

If you are not using a configlet to configure the device and want to use the ICW, select the first option, then click **Next**. The Initial Configuration Wizard welcome screen appears. Click **Next**.

To continue configuring your device with the ICW, refer to Appendix B in the *SSG 140 Hardware Installation and Configuration Guide*.

By default ethernet0/0 is bound to the Trust zone and has the IP address **192.168.1.1/24**. You can connect the SSG 140 device to your trusted network with any ports that are bound to this interface. To change the interface bindings, refer to the *SSG 140 Hardware Installation and Configuration Guide*.

The following table explains the default interface-to-zone binding.
