Sss One Scheme Of Work 2015 2016:

Criminal Litigation 2015-2016 Martin Hannibal, Lisa Mountford, 2015-07-09 Criminal Litigation offers a comprehensive and practical guide to the areas of criminal litigation covered on the Legal Practice Course Making effective use of realistic case studies backed up by online documentation the text combines theory with practical considerations and encourages students to focus on putting their knowledge into a practical context Written in an informal and accessible style it covers all procedural and evidential issues that arise in criminal cases The more complex areas of criminal litigation are examined using numerous diagrams flowcharts and examples while potential changes in the law are highlighted by specially designed Looking Ahead boxes Chapters end with key points summaries and self test questions enabling students to quickly sum up what they have read and test their own knowledge The comprehensive Online Resource Centre offers vital support to students throughout their course Updates are freely accessible to enable students to keep up to date with developments in the field while links to other useful websites and legislation encourage students to explore the subject area fully Additional online chapters exploring the practice and dynamics of police station practice regulatory crime and sentencing in road traffic accidents are included for students interested in pursuing specialist areas of accreditation An interactive timeline distinguishing between the three classifications of offences summary only either way and indictable only helps students to see how the whole criminal litigation process fits together and the issues that they need to bear in mind at particular points Lecturers are able to access video clips of fictional but realistic court proceedings that follow the case studies included in the text documentation supporting these case studies is also provided via the site Additional videos cover the procedure at the police station and sentencing in the Crown Court Online Resource Centre Student Resources Answers to self test questions Bad character case compendium Case study documentation Police station checklist Criminal Litigation Express Train timeline Updates Web links Additional chapters on Advising at the Police Station Practical Steps Regulatory Crime Sentencing in Road Traffic Cases Lecturer Resources Video case studies [Advances in Swarm and Computational Intelligence](#) Ying Tan, Yuhui Shi, Fernando Buarque, Alexander Gelbukh, Swagatam Das, Andries Engelbrecht, 2015-06-01 This book and its companion volumes LNCS volumes 9140 9141 and 9142 constitute the proceedings of the 6th International Conference on Swarm Intelligence ICSI 2015 held in conjunction with the Second BRICS Congress on Computational Intelligence CCI 2015 held in Beijing China in June 2015 The 161 revised full papers presented were carefully reviewed and selected from 294 submissions The papers are organized in 28 cohesive sections covering all major topics of swarm intelligence and computational intelligence research and development such as novel swarm based optimization algorithms and applications particle swarm optimization ant colony optimization artificial bee colony algorithms evolutionary and genetic algorithms differential evolution brain storm optimization algorithm biogeography based optimization cuckoo search hybrid methods multi objective optimization multi agent systems and swarm robotics Neural networks and fuzzy methods
