The Bureau Of Infrastructure Transport And Regional Economics Report

Geoffrey Till, Patrick Bratton

The Bureau Of Infrastructure Transport And Regional Economics Report:

Australia's Unintended Cities Richard Tomlinson, 2012-11-23 Australia's Unintended Cities identifies and researches housing and housing related urban outcomes that are unintended consequences of other policies the structure of incentives and disincentives for the housing market and governance arrangements for metropolitan areas and planning and service delivery It is argued that unintended consequences have a greater impact on the housing market and Australia's cities and their future than policies directly concerned with housing urban policy and metropolitan strategic planning The book will inform policy makers including government officials consultants and politicians It will also be used by academics and students in various areas of urban policy such as housing and urban planning as well as environment public policy and economics

ITF Research Reports Liberalisation of Air Transport International Transport Forum, 2019-05-03 Aviation is one of the most regulated industries in the world Much of this regulation is safety related to mitigate the inherent risks tied with air transport But aviation is also subject to economic regulation that influences which airline flies which route at which frequency capacity and price It even stipulates the nationality of its owners and decision makers Aviation has freed itself from some restrictions over the past three decades with many benefits to society Yet liberalisation has also raised issues with regard to maintaining fair competition high labour standards and mitigating aviation's growing environmental impact

Green Aviation Ramesh Agarwal, Fayette Collier, Andreas Schaefer, Allan Seabridge, 2016-09-20 Green Aviation is the first authoritative overview of both engineering and operational measures to mitigate the environmental impact of aviation It addresses the current status of measures to reduce the environmental impact of air travel The chapters cover such items as Engineering and technology related subjects aerodynamics engines fuels structures etc Operations air traffic management and infrastructure Policy and regulatory aspects regarding atmospheric and noise pollution With contributions from leading experts this volume is intended to be a valuable addition and useful resource for aerospace manufacturers and suppliers governmental and industrial aerospace research establishments airline and aviation industries university engineering and science departments and industry analysts consultants and researchers

City Limits Jane-Frances Kelly, Paul Donegan, 2015-03-02 Our bush heritage helped to define our identity but today Australia is a nation of cities A higher proportion of Australians live in cities than almost any other country and most of our national wealth is generated in them For most of the twentieth century our cities gave us some of the highest living standards in the world But they are no longer keeping up with changes in how we live and how our economy works The distance between where people live and where they work is growing fast The housing market isn't working locking many Australians out of where and how they'd like

to live The daily commute is getting longer putting pressure on social and family life and driving up living costs Instead of bringing us together Australia s cities are dividing Australians between young and old rich and poor the outer suburbs and the inner city Neglecting our cities has real consequences for our lives now and for our future prosperity Using stories and case studies to show how individuals families and businesses experience life in cities today this book provides an account of why Australia s cities are broken and how to fix them Bus Transport David A. Hensher,2020-04-18 Bus Transport Demand Economics Contracting and Policy examines in one source the most critical and current research themes of public transport relevant to regulators planners operators researchers and educators It highlights the wider economic impacts of public transport and compares energy usage across all public transport modes The book examines the evolving debate on Mobility as a Service MaaS and includes discussion of such themes as public image issues performance measurement and monitoring contract procurement and design models travel choice and demand and global public transport reform The book reflects the leading perspectives on the preservation and health of the bus sector intending to move public transport reform forward Compiles in one source up to date insights on important public transport themes issues and debates Examines a wide range of public transport topics in the multidisciplinary fields of economics policy operations and planning Bridges the gap between scientific research and policy implementation OECD Economic Surveys: Portugal 2008 OECD,2008-06-25 OECD s periodic review of the Portuguese economy This 2008 edition focuses on several key challenges including securing fiscal consolidation maximising the gains from integration into the world economy and improving the functioning of the labour

Vaux,2016-03-31 Building Information Modelling BIM is a global phenomenon which is gaining significant momentum across the world Currently there is little information on how to realise and monitor benefits from implementing BIM across the life cycle of a built environment asset This book provides a practical and strategic framework to realise value from implementing BIM by adapting Benefit Realisation Management theory It presents an approach for practitioners aiming to implement BIM across the life cycle of built environment assets including both buildings and infrastructure Additionally the book features wide ranging information about BIM the challenges of monitoring progress towards benefit goals and the greater context of

implementation a set of dictionaries that illustrate how benefits can be achieved what the benefit flows are and the enabling tools and processes that contribute to achieving and maximising them a suite of measures that can serve to monitor progress with examples of how they have been used to measure benefits from BIM real world examples from across the world and life cycle phases that show how these benefits can be achieved and information on international maturity and competency measures to complement the value realisation framework Including a blend of academic and industry input this book has been developed in close collaborative consultation with industry government and international research organisations and could be used for industry courses on BIM benefits and implementation for asset management or by universities that teach BIM related courses

Competition in the Railway Industry José A. Gómez-Ibáñez, Ginés de Rus, 2006-01-01 Numerous countries have attempted to improve the performance of their railways by introducing more competition but there is fierce debate and no consensus on how this is best achieved This book reveals how railways were an obvious target for reform because they were often losing traffic and money and because the government was typically deeply involved as either owner or regulator

Are We Safe Enough? Mark G. Stewart, John Mueller, 2017-09-08 Are We Safe Enough Measuring and Assessing Aviation Security explains how standard risk analytic and cost benefit analysis can be applied to aviation security in systematic and easy to understand steps The book evaluates and puts into sensible context the risks associated with air travel the risk appetite of airlines and regulators and the notion of acceptable risk It does so by describing the effectiveness risk reduction and cost of each layer of aviation security from policing and intelligence to checkpoint passenger screening to arming pilots on the flight deck Quantifies the risks costs and benefits of various aviation security methods including policing intelligence PreCheck checkpoint passenger screening behavioral detection air marshals and armed pilots Focuses on security measures that reduce costs without reducing security including PreCheck Federal Flight Deck Officer program and Installed Physical Secondary Barriers Features risk reduction insights with global applications that are fully transparent and fully explored through sensitivity analysis

Sea Power and the Asia-Pacific Geoffrey Till, Patrick Bratton, 2012-02-07 With particular focus on the Asia Pacific region this book examines the rise and fall of sea powers In the Asia Pacific region there has been significant expansion of sea based economies together with burgeoning naval power Many claim that these processes will transform the

world's future economic and security relationships. The book addresses the question of to what extent the notion of Asia rising is reflected by and dependent on its developing sea power. A central theme is the Chinese challenge to long term Western maritime ascendancy and what might be the consequences of this. In order to situate current and future developments this book includes chapters which analyse what sea power means and has meant as well as its role both historic and contemporary in the rise and fall of great powers. This book will be of much interest to students of naval power, Asian politics, strategic studies, war and conflict studies, IR and security studies.

Wastewater Analysis for Substance Abuse Monitoring and Policy Development Jeremy Prichard, Wayne Hall, Paul Kirkbride, Jake O'Brien, 2020-11-04. This book addresses how to estimate substance use and thereby evaluate policies intended to reduce the harms caused by drugs and other substances. Wastewater analysis (WWA) can provide efficient, affordable, fine-grained and objective data on population substance use trends on a very large scale. The authors discuss the potential implications of WWA as a new method for understanding substance use in a variety of settings and ignite a discourse with policy makers, criminologists, epidemiologists and other disciplines about the need for collaboration with WWA scientists. The book also features an explanation of the costs and harms of substance use with academic literature from criminological and epidemiological sources and reports from lead agencies. Additional features include: Details on the origin of wastewater analysis in environmental science; Description of analytical chemistry methods for tracing a wide variety of substances including illicit drugs, alcohol, tobacco and other chemicals; Exploration of the major empirical problems in estimating population consumption of alcohol, tobacco and drugs at the international and national level; Examination of the principles of human research ethics and their application to wastewater analysis. Wastewater Analysis for Substance Abuse Monitoring and Policy Development is a valuable tool for analytical chemists, wastewater scientists and criminologists as well as researchers and policy makers across disciplines who work in drug sectors.

It includes tables with cross-country comparisons on key safety indicators. The report outlines the most

Sustainable Futures Jenny Goldie, Katharine

Betts, 2014-12 Sustainable Futures explores the links between population growth diminishing resources and environmental challenges and the implications for Australia's future. Written by leaders in their field and based on presentations from the 2013 Fenner Conference on Population Resources and Climate Change, this book is a timely insight into the intertwined challenges that we currently face and what can be done to ensure a sustainable and viable future. The book identifies the major areas of concern for Australia's future, including environmental, social, and economic implications of population growth, mineral and natural resources, food, land, and water issues, climate change, and the obstacles and opportunities for action. Accessible, informative, and authoritative, Sustainable Futures will be of interest to policy makers, students, and professionals in the fields of sustainability and population growth.
