*Habsburg Lemberg* Markian Prokopovych,2009 When Austria annexed Galicia during the first partition of Poland in 1772 the province s capital Lemberg was a decaying Baroque town By the outbreak of the First World War in 1914 Lemberg had become a booming city with a modern urban and at the same time distinctly Habsburg flavor In the process of the long nineteenth century both Lemberg s appearance and the use of public space changed remarkably The city center was transformed into a showcase of modernity and a site of conflicting symbolic representations while other areas were left decrepit overcrowded and neglected *Habsburg Lemberg Architecture Public Space and Politics in the Galician Capital 1772 1914* reveals that behind a variety of national and positivist historical narratives of Lemberg and of its architecture there always existed a city that was labeled cosmopolitan yet provincial and a Vienna but still of the East Buildings streets parks and monuments became part and parcel of a complex set of culturally driven politics

### **Designing Urban**

**Transformation** Aseem Inam, 2013-10-23 While designers possess the creative capabilities of shaping cities their often singular obsession with form and aesthetics actually reduces their effectiveness as they are at the mercy of more powerful generators of urban form In response to this paradox *Designing Urban Transformation* addresses the incredible potential of urban practice to radically change cities for the better The book focuses on a powerful question What can urbanism be by arguing that the most significant transformations occur by fundamentally rethinking concepts practices and outcomes Drawing inspiration from the philosophical movement known as Pragmatism the book proposes three conceptual shifts for transformative urban practice a beyond material objects city as flux b beyond intentions consequences of design and c beyond practice urbanism as creative political act Pragmatism encourages us to consider how we can make deeper and more systemic changes and how urbanism itself can be a design strategy for such transformations To illuminate how these conceptual shifts operate in vastly different contexts through analysis of transformative urban initiatives and projects in Belo

Horizonte Boston Cairo Karachi Los Angeles New Delhi and Paris The book is a rare integration of theory and practice that proposes essential ways of rethinking city design and building processes while drawing critical lessons from actual examples of such processes

**Riyadh** Yasser Elsheshtawy, 2021-09-27 Riyadh has set its sights on becoming a world city befitting the twenty first century To that end it has embarked on a massive construction drive evidenced in the proliferation of proposals for high end districts giga developments and elaborate infrastructures An urban vision seemingly dedicated to attracting global capital Yet such a narrative can be misleading A humanization programme initiated during the tenure of its former mayor Abdulaziz bin Ayyaf has complemented the city's rapid rise by providing spaces catering for the everyday needs of its inhabitants Yasser Elsheshtawy in this richly illustrated book targets these people centred settings It is a compelling counter narrative interweaving critical theoretical insights personal observations and serendipitous encounters He deftly demonstrates how Riyadh thrives through the actions of its people As the world moves towards an urban model that is resilient and humane the humanizing efforts of an Arab city are worthy of our attention Riyadh's premise is perhaps best captured in the cover image depicting the desert riverbed of Wadi Sulai filled with rainwater making its way towards the Saudi capital Along its banks there will be dedicated public pathways and urban parks It is a vision of an urbanity where both the spectacular and the everyday coexist A city that is not just dedicated to the few but one that serves the many

**Function-Based Spatiality and the Development of Korean Communities in Japan** David Rands, 2014-05-21 Function Based Spatiality and the Development of Korean Communities in Japan utilizes the theoretical model of complex adaptive systems and introduces the concept of function based spatiality to investigate the roles of the urban environments of Tokyo and Osaka in the development of Korean communities in Japan Analysis of distinct Korean communities allows for the examination of urban factors of each city which contributed to the patterns of Korean immigration and community formation By utilizing a comparative narrative of the two cities distinctions between the organic growth of Osaka and the planned city of Tokyo are illuminated Additionally the discussion utilizes the concept of function based spatiality to show how each city interacted with its surrounding regional national and global spheres The functions of Tokyo as a gateway to Western modernization and center of the Japanese state shaped the interactions with Korean immigrants Likewise Osaka's functions as a center of mercantilism and second city played a large role in how Koreans were incorporated into the urban ethnoscaapes Taken together these two examples provide insight to the dynamics of urban systems on the development of immigrant communities

Safavid Persia in the Age of Empires Charles Melville, 2021-02-25 The sixteenth and seventeenth centuries saw the establishment of the new Safavid regime in Iran Along with reuniting the Persian lands under one rule the Safavids initiated

the radical transformation of the religious landscape by introducing Imami Shi'ism as the official state faith and in this as in other ways laying the foundations of Iran's modern identity. In this book leading scholars of Iranian history, culture and politics examine the meaning of the idea of Iran in the Safavid period by examining contemporary experiences of both insiders and outsiders, asking how modern scholarship defines the distinctive features of the age. While sometimes viewed as a period of decline from the high points of classical Persian literature and the visual arts of preceding centuries, the chapters of this book demonstrate that the Safavid era was nevertheless a period of great literary and artistic activity in the realms of both secular and theological endeavour. With the establishment of comparable polities across western, southern and central Asia at broadly the same time, the book explores some of the literary and political interactions with Iran's Ottoman, Mughal and Uzbek neighbours. As the volume and frequency of European merchants and diplomats visiting Safavid Persia increased, especially in the seventeenth century, and as more Iranians recorded their own travel experiences to surrounding Muslim lands, the Safavid period is the first in which we can document and explore the contours of Iran's place in an expanding world and gain insights into how Iranians saw themselves and others saw them. The Guarded Age David J. Betz, 2023-10-25

The fall of the Berlin Wall in 1989 came to symbolize the dawn of a new era of openness and connectivity. Yet today the world is ever more divided, demarcated and quite literally fortified. We are living in a guarded age. Why and how has this happened? Where will it take us? In this book David J. Betz explores the expansion of fortified physical infrastructure at every level of the global political economy. In cities where security is increasingly designed into public buildings and spaces as they are reshaped to mitigate mass terror attacks. Within corporations who are burying their electronic assets in deep underground caverns and behind the leaded walls of ex-nuclear war bunkers against a range of threats and feared contingencies. In many urban areas where the default condition of civil life is to be walled, gated, watched and guarded. Year after year, hundreds of miles of linear obstacles, walls, ditches and watchtowers are added to national borders. Practically everywhere you look, there are signs of innovative fortification, often designed to be overlooked. The Guarded Age reveals the barriers which most have observed but few until reading this book have truly seen. *The Lives of a Roman Neighborhood* Paul W. Jacobs, II, Paul W. Jacobs (II), 2022-12

Takes one of the world's longest continuously occupied urban neighborhoods and explores the trace of early development on the future space. **Tracing the Jerusalem Code** Eivor Andersen Oftestad, Joar Haga, 2021-04-19

With the aim to write the history of Christianity in Scandinavia with Jerusalem as a lens, this book investigates the image or rather the imagination of Jerusalem in the religious, political and artistic cultures of Scandinavia through most of the second millennium. Jerusalem is conceived as a code in this volume, focussing on Jerusalem's impact on Protestantism and Christianity in Early Modern Scandinavia. Tracing the Jerusalem Code in three volumes: Volume 1: The Holy City: Christian Cultures in Medieval Scandinavia ca. 1100-1536; Volume 2: The Chosen People: Christian Cultures in Early Modern Scandinavia 1536-ca. 1750; Volume 3: The Promised Land: Christian Cultures in Modern Scandinavia ca. 1750-ca. 1920.
