Drinking Water Quality and Human Health

Patrick Levallois, Cristina Villanueva Belmonte, 2019-04-04 The quality of drinking water is paramount for public health Despite important improvements in the last decades access to safe drinking water is not universal The World Health Organization estimates that almost 10% of the population in the world do not have access to improved drinking water sources Among other diseases waterborne infections cause diarrhea which kills nearly one million people every year mostly children under 5 years of age On the other hand chemical pollution is a concern in high income countries and an increasing problem in low and middle income countries Exposure to chemicals in drinking water may lead to a range of chronic non communicable diseases e g cancer cardiovascular disease adverse reproductive outcomes and effects on children s health e g neurodevelopment among other health effects Although drinking water quality is regulated and monitored in many countries increasing knowledge leads to the need for reviewing standards and guidelines on a nearly permanent basis both for regulated and newly identified contaminants Drinking water standards are mostly based on animal toxicity data and more robust epidemiologic studies with accurate exposure assessment are needed The current risk assessment paradigm dealing mostly with one by one chemicals dismisses the potential synergisms or interactions from

exposures to mixtures of contaminants particularly at the low exposure range Thus evidence is needed on exposure and health effects of mixtures of contaminants in drinking water Finally water stress and water quality problems are expected to increase in the coming years due to climate change and increasing water demand by population growth and new evidence is needed to design appropriate adaptation policies This Special Issue of International Journal of Environmental Research and Public Health IJERPH focuses on the current state of knowledge on the links between drinking water quality and human health

hospitality industry is rapidly undergoing a disruptive transformation owing to advances in information and communications technology. This book aims to highlight how the unfolding digital transformation trends help the industry attain sustainable development by taking full account of its current and future economic, social and environmental impacts and addressing the needs of tourists, the industry, the environment and destinations. With the advent of digital technologies following the Fourth Industrial Revolution (4IR), there has been a rapid change in how customers and businesses interact regarding the timeliness and relevance of communication. Although the positive effects of digital transformation have received sustained scholarly interest, its adverse effects as well as how the digitisation of tourism operations can enable the achievement of sustainable development have attracted limited academic focus. The book comprises contributions that generate theoretical insights, empirical findings and evidence-based recommendations by focusing on emerging and forecasted technologies used in the tourism and hospitality industry, such as blockchains, robots, Artificial Intelligence, Virtual Reality, big data and analytics. The book could be helpful for future research to focus on the impact of different forms of digital technology by examining their sociocultural and environmental effects. Building on prior research, the chapters in this volume extrapolate current studies on digital development to provide more links to tourism and hospitality.

Online Teaching and Learning in the COVID-19 Era Felix Maringe, Otilia Chiramba, 2023-11-30 This book examines the ongoing changes initially caused by the COVID-19 pandemic and the future prospects of teaching and learning in higher education institutions. It focuses on the impact of online education on issues of learning equity and epistemic justice. The transition from traditional face-to-face teaching to remote learning has exacerbated existing inequalities in epistemological access among higher education students despite the shortcomings of the former in this regard. The book features essays by African academics who reflect on the challenges of epistemological access during the sudden shift to hybrid, blended and remote teaching and learning. It specifically explores the question of equitable learning in diverse home contexts, drawing on both theoretical and empirical studies conducted by the authors in South African universities and the region. The chapters employ the conceptual framework of epistemic injustice to define and explore various forms of such injustice, providing a basis for analyzing the implications of the transition to online pedagogy.
