Tshwane University Of Technology 2015:

University on the Border Lis Lange, Vasu Reddy, Siseko H. Kumalo, 2021-08-27 The volume explores and thinks through the process of decolonising the South African higher education system by examining MustFall. The text offers theoretical insights from a historical contemporary and multidisciplinary lens while examining the embedded meanings of the university as an institution, idea and set of practices to show the shifts and changes that were inaugurated by MustFall along with the historicities that define the university both locally and globally. The retro and prospective insights presented in the book surface the crisis of authority that places the university in a state of precarity which is framed in the book as the border. The volume proposes the concept of the border recognising its conceptual and analytical dynamism as a generative space that can facilitate new imaginaries and articulations of this social institution, the university. Explorations in Southern African Drama, Theatre and Performance Patrick J. TMS 2015 144th Annual Meeting & Exhibition, Annual Meeting Supplemental Proceedings The Minerals, Metals & Materials Society (TMS),2016-12-20 *ECRM2015-Proceedings of the 14th European Conference on Research Methods 2015* Dr Vincent Cassar,Dr Frank Bezzina,2015-06-01 Complete proceedings of the 14th European Conference on Research Methodology for Business and Management Studies Valletta Malta Published by Academic Conferences and Publishing International *Towards Sustainable Food Production in Africa* Morris Fanadzo,Nothando Dunjana,Hupenyu Allan Mupambwa,Ernest Dube,2023-07-10 This edited book is focused on Sustainable Development Goal 2 It offers a comprehensive and topical collection of practices technologies and innovations in the field of sustainable food production and security under a changing climate It is a one stop handbook for farmers researchers extensionists policy makers and other stakeholders seeking to identify and disseminate best fit technologies for local and regional landscapes It offers an understanding of the challenges risks and uncertainties as well as opportunities to foster productive and sustainable food production Smallholder farming and agriculture in general is facing a serious threat from climate change that has resulted in erratic and unpredictable rainfall and increased temperatures among other abiotic stresses These climate change induced pressures have reduced productivity mainly among the smallholder farmers who are critical in

driving the attainment of sustainable development goals like SDG 2 12 and 13 The objective of the book is to document effective and practicable practices and technologies that can be adopted by smallholder African farmers as mitigation measures against the effects of climate change This book is of interest to researchers agricultural scientists climate change scientists capacity builders and policymakers *The Urban Ecologies of Divided Cities* Amira Osman, John Nagle, Sabyasachi Tripathi, 2023-06-12 The book discusses how division affect the fabric of cities and people s sense of identity and agency and are reflected in physical features architecture and urban planning The question of divided cities represents a complex and multistranded urban Ecology at once both social and spatial it cannot be limited to a single science or discipline such as social or spatial fields This suggests integrated and cross disciplinary understandings as well as integrated or parallel approaches and solutions Urban ecologies of division manifest in multiple forms One of their most palpable expressions is conflict with parallels around the world and often with correlations in the spatial fabric Violence in such contexts is often a surface expression of deeper socio economic or ideological differences Whether as a result of intervention by authority or by dissent between groups a divided city inevitably becomes a place of conflict in various forms and intensity eroding the joy of living and sense of collective belonging to the detriment of all In effect it erodes the collective advantage of being part of a more unified society A city exists in collections of social structures which mutually form a society A divided city implies divided social structures and in consequence a divided society The papers compiled in this book present many case studies of divided cities discussing the different causes of divisions and their effects on societies Some of the causes can be linked to conflicts wars colonialism or legislative political systems In response to the serious challenges resulting from these divisions the book aims to provide opportunities for new approaches and possibilities for new interventions and solutions making it significant to urban planners architects and policymakers *ICMLG 2018 6th International Conference on Management Leadership and Governance* Dr Vincent Ribiere, 2018-05-24 These proceedings represent the work of researchers participating in the 6th International Conference on Management Leadership and Governance ICMLG 2018 which is being hosted this year by the Institute for Knowledge and Innovation Southeast Asia IKI SEA a Centre of Excellence of at Bangkok University Thailand on 24 25 May 2018 Research Universities in Africa Cloete, Nico, Bunting, Ian, 2018-11-09 From the early 2000s a new discourse emerged in Africa and the international donor community that higher education was important for development in Africa Within this zeitgeist of converging interests a range of agencies agreed that a different collaborative approach to linking higher education to development was necessary This led to the establishment of the Higher Education Research and Advocacy Network in Africa Herana to concentrate on research and advocacy about the possible role and contribution of universities to development in Africa This book is the final publication to emerge from the Herana project The project has also published more than 100 articles chapters reports manuals and datasets and many presentations have been delivered to share insights gained from the work done by Herana Given its prolific dissemination it seems reasonable to

ask whether this fourth and final publication will offer the reader anything new This book is certainly different from previous publications in several respects First it is the only book to include an analysis of eight African universities based on the full 15 years of empirical data collected by the project Second previous books and reports were published mid project This book has benefited from an extended gestation period allowing the authors and contributors to reflect on the project without the distractions associated with managing and participating in a large scale project For the first time some of those who have been involved in Herana since its inception have had the opportunity to at least make an attempt to see part of the wood for the trees Different does not necessarily mean new An emphasis on the newness of the data and perspectives presented in this book is important because it shows that it is more than a historical record of a donor funded project Rather each chapter in this book brings to a lesser or greater extent something new to our understanding of universities research and development in Africa

Clown of the City Stephan de Beer,2020-11-25 At opening this book everything one has learned or thought about urban ministry is challenged and changed Stephan de Beer offers a fresh exciting and thoroughly engaging approach The title is enticing and playful but the book is a serious grappling with the daunting realities of a shadowed marginalised urban life It does not theorise or pontificate about a concept The author is not a distant neutral observer He is an engaged minister to the people a struggler in their struggles prophet to the powerful This book invites the reader to join the people of the cities under siege by failed policies empty promises and disastrous politics in their struggles for meaningful life and it makes a powerful persuasive case Stephan de Beer has offered us a great gift and a wonderful opportunity to think and hope anew and differently about the life reality and future of the city
