Design of Functional Polymer Nanocomposites Rotimi Sadiku, Oluranti Agboola, Kokkarachedu Varaprasad, Mapula Lucey Mavhungu, 2025-07-01 *Design of Functional Polymer Nanocomposites: Interface and Interphase Reactions, Compatibilization, and Bond Behavior and Functionalization Procedures* reviews the latest developments in this fast moving research field. The book discusses interface and interphase interactions in polymer nanocomposites, as well as compatibilization behavior and different functionalization procedures. It illustrates how each of these essential tools can be used in the design of new polymer nanocomposites for a broad range of different industrial scale applications. In the research and development of polymer nanocomposites, the interface and interphase reactions of different constituents is extremely important. They play a vital role in introducing additional features and in the final resultant properties of the nanocomposite. In addition, final properties are also dependent upon the bond behavior and the reaction and interface created between the two constituents. Covers interface and interphase reactions. Discusses compatibilization behavior and different functionalization procedures as essential design tools. Presents preparation strategies such as polycondensation, copolymerization, and free radical chain polymerization. Provides a diverse focus on a wide range of high performance applications. Research Data Access and Management in Modern Libraries Bhardwaj, Raj Kumar, Banks, Paul, 2019-05-15 Handling and archiving data should be done in a highly professional and quality controlled manner. For academic and research libraries, it is required to know how to document data and support traceability, as well as to make it reusable and productive. However, these institutions have different requirements relating to the archiving and reusability of data. Therefore, a comprehensive source of information is required to understand data access and management within these organizations. *Research Data Access and Management in Modern Libraries* is a critical scholarly resource that delves into innovative data management strategies and strategy implementation in library settings and provides best practices to stakeholders using the latest tools and technology. It further explores concepts such as research data management, data access, data preservation, building document and data institutional repositories, applications of Web 2.0 tools, mobile technology applications in data
