Apartheid and Fragmented Protest in Contemporary Southern Africa examines protest movements through the lens of Apartheid Studies the first general theory of apartheid which explores how oppression harm injustice poverty loss and inequality persist The book argues that apartheid which breaks the world of the oppressed into fragments fomenting diverse experiences of oppression among its victims frames the nature and course of protests by making them subject to its fragmentation Protest is thus redefined as good neighbourly and demoted on account of its symbiotic relationship to apartheid It is observed that the proliferation of protests does not preclude the persistence of apartheid Rather protest and apartheid are seen to be compatible By examining protest hashtags on X from South Africa and Zimbabwe the book explores and identifies the forms relations meanings trajectories and effects protests take evoke and embody as fragments subsisting in a fractured apartheid universe It demonstrates how and why life goes on amidst protest sheds light on the contradictions paradoxes and complexities that characterise protest movements and invites conversations around protest as a paradigm in the context of apartheid The book will be of interest to researchers across the fields of social movements protests sociology African Studies and communication and media studies **Carbon Related Materials** Satoru Kaneko,Masami Aono,Alina Pruna,Musa Can,Paolo Mele,Mehmet Ertugrul,Tamio Endo,2020-10-12

Epistemic Freedom in Africa is about the struggle for African people to think theorize interpret the world and write from where they are located unencumbered by Eurocentrism The imperial denial of common humanity to some human beings meant that in turn their knowledges and experiences lost their value their epistemic virtue Now in the twenty first century descendants of enslaved displaced colonized and racialized peoples have entered academies across the world proclaiming loudly that they are human beings their lives matter and they were born into valid and legitimate knowledge systems that are capable of helping humanity to transcend the current epistemic and systemic crises Together they are engaging in diverse struggles for cognitive justice fighting against the epistemic line which haunts the twenty first century The renowned historian and

decolonial theorist Sabelo J Ndlovu Gatsheni offers a penetrating and well argued case for centering Africa as a legitimate historical unit of analysis and epistemic site from which to interpret the world whilst simultaneously making an equally strong argument for globalizing knowledge from Africa so as to attain ecologies of knowledges This is a dual process of both deprovincializing Africa and in turn provincializing Europe The book highlights how the mental universe of Africa was invaded and colonized the long standing struggles for an African university and the trajectories of contemporary decolonial movements such as Rhodes Must Fall and Fees Must Fall in South Africa This landmark work underscores the fact that only once the problem of epistemic freedom has been addressed can Africa achieve political cultural economic and other freedoms This groundbreaking new book is accessible to students and scholars across Education History Philosophy Ethics African Studies Development Studies Politics International Relations Sociology Postcolonial Studies and the emerging field of Decolonial Studies The Open Access versions Chapter 1 and Chapter 9 available at <https://doi.org/10.4324/9780429492204> have been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license

Decolonisation after Democracy Laurence Piper, 2020-05-21 Decolonisation after Democracy addresses the provocative idea that we need to rid higher education of lingering forms of colonial knowledge This matters because in the colonial era much knowledge was put to the service of subjugating indigenous peoples and the assumptions from this era may linger into the present Examples of deep rooted and foundational forms of knowledge that carry colonial traits are normative binaries such as civilised and backward modern and traditional and rational and superstitious In addition some accounts of positive values like freedom equality justice and democracy may hide the assumption that the western experience is the norm from which other kinds are rendered imitations deviations or pathologies In this collection some of South Africa's leading political scientists and academics engage with the challenge of decolonising knowledge in the research and teaching of politics It includes new insights about the state international relations clientelism statesociety relations and land reform and introduces new ways to engage the colonial library curriculum reform and the marginality of historically black institutions Finally the contributors deal with the decolonial challenge posed by the FeesMustFall student movements reflecting on issues of revolutionary politics and gender and sexual violence This book was originally published as a special issue of *Politikon*
