

Figure 1-3 — General Truck

10. Optional auxiliary control lever is used for operating single function attachments. On trucks so equipped, see directions on panel for operation.

11. When parking truck, move directional control lever to neutral, lower forks to floor, and turn off key switch. Apply parking brake. When leaving truck, seat will raise and cutout switch will open. Motor brake will apply.

An audible reminder sounds if driver leaves the truck without applying the parking brake.

The directional switch is fastened to the steering column in such a manner that the forward position of the lever results in forward motion of the truck; rearward position in backward motion. Midway between these positions is neutral.

NOTE: This truck is equipped with an automatic, solid state, electrical return-to-neutral feature which minimizes the possibility of inadvertent truck movement. The truck will not move forward or rearward until the direction selector has been moved through neutral. This applies even though the selector has been left in the position in which the operator wants to go. For example,

if the selector has been left in forward and the operator gets on the truck to go forward, he must move the selector to neutral and back to forward before the truck will advance. This feature helps prevent the truck from moving unexpectedly when the operator switches on power.

Truck speed increases with travel of the accelerator pedal. Top speed is reached with full pedal depression.

NOTE: The truck has been designed so that it may be safely operated using the same foot for both the accelerator and the brake. These pedals can never be operated at the same time.

Turn to Section 2 in this manual for the recommended hourly service intervals. Regular attention at the specified time will pay dividends in maximum efficiency and longer life.

If at any time unusual noise is noticed or any part of the truck is found to be in need of repair, defective or in any way unsafe, the matter must be reported immediately to the designated authority and the truck must be taken out of service until it has been restored to a safe operation condition.

Only qualified and authorized personnel should be permitted to maintain, repair, adjust and inspect this truck.
