The Low Countries Jozef Deleu, 1995 **Cumulated Index to the Books** ,1999 **Smart Cities as Democratic Ecologies** Daniel Araya, 2015-11-17 The concept of the smart city as the confluence of urban planning and technological innovation has become a predominant feature of public policy discourse Despite its expanding influence however there is little consensus on the precise meaning of a smart city One reason for this ambiguity is that the term means different things to different disciplines For some the concept of the smart city refers to advances in sustainability and green technologies For others it refers to the deployment of information and communication technologies as next generation infrastructure This volume focuses on a third strand in this discourse specifically technology driven changes in democracy and civic engagement In conjunction with issues related to power grids transportation networks and urban sustainability there is a growing need to

examine the potential of smart cities as democratic ecologies for citizen empowerment and user driven innovation What is the potential of smart cities to become platforms for bottom up civic engagement in the context of next generation communication data sharing and application development What are the consequences of layering public spaces with computationally mediated technologies Foucault s notion of the panopticon a metaphor for a surveillance society suggests that smart technologies deployed in the design of smart cities should be evaluated in terms of the ways in which they enable or curtail new urban literacies and emergent social practices **Remote Sensing and Global Change** Remote Sensing Society.
