Journalism and Climate Crisis Public Engagement Media Alternatives recognizes that climate change is more than an environmental crisis It is also a question of political and communicative capacity This book enquires into which approaches to journalism as a particularly important form of public communication can best enable humanity to productively address climate crisis The book combines selective overviews of previous research normative enquiry what should journalism be doing and original empirical case studies of environmental communication and media coverage in Australia and Canada Bringing together perspectives from the fields of environmental communication and journalism studies the authors argue for forms of journalism that can encourage public engagement and mobilization to challenge the powerful interests vested in a high carbon economy facilitative and radical roles particularly well suited to alternative media and alternative journalism Ultimately the book argues for a fundamental rethinking of relationships between journalism publics democracy and climate crisis This book will interest researchers students and activists in environmental politics social movements and the media

Anchored in Place Bank, Leslie, Cloete, Nico, 2018-11-05 Tensions in South African universities have traditionally centred around equity particularly access and affordability historical legacies such as apartheid and colonialism and the shape and structure of the higher education system What has not received sufficient attention is the contribution of the university to place based development This volume is the first in South Africa to engage seriously with the place based developmental role of universities In the international literature and policy there has been an increasing integration of the university with place based development especially in cities This volume weighs in on the debate by drawing attention to the place based roles and agency of South African universities in their local towns and cities It acknowledges that universities were given specific

development roles in regions homelands and towns under apartheid and comments on why sub national place based development has not been a key theme in post apartheid higher education planning Given the developmental crisis in the country universities could be expected to play a more constructive and meaningful role in the development of their own precincts cities and regions But what should that role be Is there evidence that this is already occurring in South Africa despite the lack of a national policy framework What plans and programmes are in place and what is needed to expand the development agency of universities at the local level Who and what might be involved Where should the focus lie and who might benefit most and why Is there a need perhaps to approach the challenges of college towns secondary cities and metropolitan centers differently This book poses some of these questions as it considers the experiences of a number of South African universities including Wits Pretoria Nelson Mandela University and especially Fort Hare as one of its post centenary challenges
