

Ultrasep Superplus UFS-SP/ UFS-SP N

Oil/water separator
for air compressor condensate

Function

A pressure relief chamber separates condensate and expanding air. The condensate then passes a sedimentation compartment – easy to remove and therefore easy to clean.

The next step is the coalescing filter with its additional oil separation effect. Free floating oil is siphoned off into an oil can. In the activated carbon adsorber the water is purified from the last oil droplets. Pure water leaves the unit ready to be drained according to the rules of law.

Safety

The activated carbon is protected by a preadsorber.

A bright yellow floaters warns about the beginning of a blockade of the carbon by oil sludge.

The water quality can be checked visibly with a simple turbidity comparison. The incorporated oil canister can only be changed if the oil flow is interrupted.

Application:

UFS-SP are oil/water separators for the purification of air compressor condensate to legal discharge limits.

Construction

The range of UFS-SP/ UFS-SP N are in total 7 sizes: 5 single units of 2 or 4 separated UFS.
