 innovative comparative project that engages with Anglo American French and German literatures on the subject of regional
 governance It expands the comparative angle from issues of economic competitiveness and social cohesion to topical and

relevant fields such as housing and transportation and it expands comparative work on municipal governance to the regional scale With contributions from established and emerging international scholars of urban and regional governance the volume covers conceptual topics and case studies that contrast the experience of a range of Canadian metropolitan regions with a strong selection of European regions It starts from assumptions of limited conversion among regions across the Atlantic but is keenly aware of the remarkable differences in urban regions path dependencies in which the larger processes of globalization and neo liberalization are situated and materialized
