and offers suggestions as to what can be done to overcome it. It invites the best entrepreneurial talent and scientific and technological know-how to develop a sustainable economy around sustainable communities, services, and sectors. A major obstacle previously identified by involved parties was the ability of accommodating for the emerging economic growth without causing harm to the environment, especially with resource depletion. This book provides the solution by creating a need to bring on a new revolution that preserves the rights of next generations to live in a healthy environment. This Sustainability Revolution requires the integration of economic, environmental, and social factors as well as the practical aspects of implementing sustainability through green activities, which are discussed throughout the book. In this book, a globalization is proposed that encourages creativity and innovation towards sustainability. With this global sustainability approach, real globalization, both rich and poor, will benefit from the global sustainability approach. This will close the gap between rich and poor. Developing countries could reap the benefit of current technology without undergoing many of the growing pains associated with development of these technologies. Governments are able to better work together towards common goals now that there is an advantage in cooperation, an improved ability to interact and coordinate, and a global awareness of issues. The book presents a sustainability roadmap to bring together various concepts that have been dealt with independently by previous authors and link them to establish the fundamental practical steps. The flow path and the direction for successful implementation of a sustainability roadmap are also discussed in detail in the book. For the first time, the authors use sustainable communities to create a better quality of life for residents while minimizing the use of the resources to meet current needs and ensure adequate resources for future generations. These green communities create new industries for the local economy and improve public health, which offers more hope for their citizens. Sustainable transportation, renewable energy, recycling, clean water, and urban forests help to make a more livable community and help to control the global climate change. They involve all citizens and incorporate local values into decision making.

The Design of Learning Experience Brad Hokanson, Gregory Clinton, Monica W. Tracey, 2015-07-03 This book delves into two divergent yet parallel themes first is an examination of how educators can design the experiences of learning with a focus on the learner and the end results of education and second how educators learn to design educational products processes and experiences The book seeks to understand how to design how learning occurs both in the instructional design studio and as learning occurs throughout the world This will change the area s semantics at a deeper level it will change its orientation from instructors and information to learners and it will change how educators take advantage of new and old technologies This book is the result of a research symposium sponsored by the Association for Educational Communications and Technology AECT

Schools That Heal Claire Latane, 2021-06-03 Research shows that access to nature big classroom windows and open campuses along active streets reduce stress anxiety disorderly conduct and crime Yet too many American public schools look and feel like prisons They are designed out of fear of vandalism truancy and added maintenance costs Despite decades of research demonstrating the benefits of restorative school environments for students mental physical and academic success they aren t yet part of mainstream conversations about mental health and wellbeing or school planning design maintenance and safety Restorative school environments can invite and build a broad community around our children and adolescents improve the quality of the neighborhood reduce students anxiety and aggression and make them feel safer more hopeful and whole Schools That Heal explains the compelling connections between human health and school design and look at how investing in school design elements large and small that promote health can positively impact both students and the entire community promoting resilience and environmental justice

From Collective Beings to Quasi-Systems Gianfranco Minati, Eliano Pessa, 2018-01-29 This book outlines a possible future theoretical perspective for systemics its conceptual morphology and landscape while the Good Old Fashioned Systemics GOFS era is still under way The change from GOFS to future systemics can be represented as shown in the book title by the conceptual change from Collective Beings to Quasi systems With the current advancements problems and approaches occurring in contemporary science systemics are moving beyond the traditional frameworks used in the past From Collective Beings to Coherent Quasi Systems outlines a conceptual morphology and landscape for a new theoretical perspective for systemics introducing the concept of Quasi systems Advances in domains such as theoretical physics philosophy of science

cell biology neuroscience experimental economics network science and many others offer new concepts and technical tools to support the creation of a fully transdisciplinary General Theory of Change This circumstance requires a deep reformulation of systemics without forgetting the achievements of established conventions The book is divided into two parts Part I examines classic systemic issues from new theoretical perspectives and approaches A new general unified framework is introduced to help deal with topics such as dynamic structural coherence and Quasi systems This new theoretical framework is compared and contrasted with the traditional approaches Part II focuses on the process of translation into social culture of the theoretical principles models and approaches introduced in Part I This translation is urgent in post industrial societies where emergent processes and problems are still dealt with by using the classical or non systemic knowledge of the industrial phase
