## **Some Choice Law Medicine And The Market:**

**Some Choice** George J. Annas,1998 This book is a passionate critique of the shallowness of choice rhetoric used to camouflage critical personal and public policy issues in contemporary debates in American medicine Our public discourse on life and death from health care to medical research and from risky behavior to assisted suicide is dominated by the market model of consumerism augmented by appeals to individual freedom In fact however in most cases there is no real choice left for individuals to make the important choices have been made by others and the illusion of choice fosters complacency Knee jerk libertarianism leads to a superficial consumer culture and life choices valued only by their monetary value Some Choice uses the cases of cloning drive through deliveries emergency medicine genetic privacy human experimentation tobacco control and physician assisted suicide among others to suggest ways in which we can break through our vapid and superficial public discourse on life and death issues and begin to engage in a public dialogue that enriches our lives and society rather than cheapens them George Annas is one of the most widely recognized names in current bioethics debates His goal in this new book is to help open a national and international dialogue that sees the search for universal human rights as valuable and international cooperation to define protect and promote them as central to life **Bioethical and Evolutionary**

**Approaches to Medicine and the Law** W. Noel Keyes,2007 Bioethics is a multidisciplinary field of law and one that can not be ignored Bioethical and Evolutionary Approaches to Medicine and the Law is a comprehensive scholarly analysis of bioethics and the development of its standards The book is broken up into the following four parts Part I deals with scientific religious ethical and legal aspects of bioethics Part II evaluates 100 current bioethical issues and sets forth specific approaches for their resolution Part III focuses on medical legal and other problems from beginning of life overpopulation birth control in vitro fertilization etc through end of life physician assisted suicide advance directives euthanasia etc Part IV discusses the major bioethical issues in genetics and genetic engineering *Research Handbook on Voluntary Assisted Dying Law, Regulation and Practice* Ben P. White,2025-09-10 This unique Research Handbook examines voluntary assisted dying VAD laws through the lens of regulatory theory It sheds light on interdisciplinary perspectives and outlines policy debates around the revision and implementation of these laws Ben P White brings together global experts to discuss the law and practice of VAD in all permitting jurisdictions This title contains one or more Open Access chapters **American**

**Bioethics** George J. Annas,2009 Bioethics was born in the USA and the values American bioethics embrace are based on American law including liberty and justice This book crosses the borders between bioethics and law but moves beyond the domestic law bioethics struggles for dominance by exploring attempts to articulate universal principles based on international human rights The isolationism of bioethics in the US is not tenable in the wake of scientific triumphs like decoding the human genome and civilizational tragedies like international terrorism Annas argues that by crossing boundaries which have artificially separated bioethics and health law from the international human rights movement

American bioethics can be reborn as a global force for good instead of serving mainly the purposes of U S academics This thesis is explored in a variety of international contexts such as terrorism and genetic engineering and in U S domestic disputes such as patient rights and market medicine The citizens of the world have created two universal codes science has sequenced the human genome and the United Nations has produced the Universal Declaration of Human Rights The challenge for American bioethics is to combine these two great codes in imaginative and constructive ways to make the world a better and healthier place to live      Perspectives on Health and Human Rights Sofia Gruskin,2005 This anthology of articles collected by a cast of award winning scholars in the field of public health illustrates that promoting and protecting human rights is fundamental to promoting and protecting health New issues covered in this volume include emerging technologies family and health responding to violence and methods and strategies      **Handbook of Psychology, Health Psychology** Arthur M. Nezu,Christine M. Nezu,Pamela A. Geller,2003-01-07 Includes established theories and cutting edge developments Presents the work of an international group of experts Presents the nature origin implications an future course of major unresolved issues in the area      *Legal and Ethical Regulation of Biomedical Research in Developing Countries* Remigius N. Nwabueze,2016-04-22 There has been a rapid increase in the pace and scope of international collaborative research in developing countries in recent years This study argues that whilst ethical regulation of biomedical research in Africa and other developing countries has attracted global attention legal liability issues such as the application of common law rules and the development of legally enforceable regulations have been neglected It examines some of the major research scandals in Africa and suggests a new ethical framework against which clinical trials could be conducted The development of research guidelines in Uganda Tanzania Malawi and Nigeria are also examined as well as the role of ethics committees Providing a detailed analysis of the law of negligence and its application to research ethics committees and their members common law and constitutional forms of action and potential negligence claims the book concludes by suggesting new protocols and frameworks improved regulation and litigation This book will be a valuable guide for students researchers and policy makers with an interest in medical law and ethics bioethics customary law in Africa and regulation in developing countries      **Changing the U.S. Health Care System** Ronald M. Andersen,Thomas H. Rice,Gerald F. Kominski,2011-02-15 The third edition of Changing the U S Health Care System is a thoroughly revised and updated compendium of the most current thought on three key components of health care policy improving access ensuring quality and controlling costs Written by a panel of health care policy experts this third edition highlights the most recent research relevant to health policy and management issues New chapters address topics such as the disparities in health and in health care information systems and performance in the area of nursing Revisions to chapters from the previous edition emphasize the most recent developments in the field      *Genes, Women, Equality* Mary Briody Mahowald,1999-10-14 Genetics is not gender neutral in its impact Mahowald cites a wide range of biological and psychosocial examples that reveal its different impact on men and

women especially with regard to reproduction and caregiving She examines the extent to which these differences are associated with gender injustice arguing for positions that reduce inequality between the sexes The critical perspective Mahowald brings to this analysis is an egalitarian interpretation of feminism that demands attention to inequalities arising from racism ethnocentrism ableism and classism as well as sexism Eschewing a notion of equality as sameness Mahowald defines equality as attribution of the same value to different objects Gender justice she claims imputes the same value to men and women despite their differences It can only be maximized by practical efforts to equalize the burdens and benefits associated with genetics The topics considered include participation in research allocation of genetic services cultural difference sex selection misattributed paternity prenatal and preimplantation diagnosis carrier testing genetic interventions genetic disabilities preferences for genetic ties to offspring genetic susceptibility to late onset disorders behavioral genetics genetic discrimination in employment and insurance and human cloning Cases both real and concocted are used to illustrate the questions addressed

*Guiding Icarus* Rahul K. Dhanda, 2003-03-31 There is a palpable need for business to explore the issues Dhanda raises *Guiding Icarus* offers a flight plan from the Foreword by Philip R Reilly *Guiding ICARUS Merging Bioethics with Corporate Interests* Rahul K Dhanda While bioethicists may enjoy the most thorough appreciation of both the promise and perils of new biotechnologies international corporations are in fact the entities generating these technologies and determining their application An industry insider versed in the language of bioethics Rahul Dhanda offers in *Guiding Icarus Merging Bioethics with Corporate Interests* a Rosetta stone to these two camps explaining why each needs the other why their disparate concerns often cohere and why an ethical business is likely a successful one The author develops a dialogue between bioethics and corporate interests by examining case studies of several hot button issues including Genetically modified foods DNA data banking Personalized medicine Stem cell research In each instance he provides a treatment of the particular science under consideration a list of the benefits of the technology a description of the ethical issues involved an account of past industry response and recommendations for future action Given the expansive nature of biotechnology ramifications in the pharmaceutical and agricultural industries are covered in depth as well The book also features a Foreword by world renowned bioethicist and biotechnology CEO Philip R Reilly as well as a step by step discussion of the components of business and bioethical issues Written for a general audience *Guiding Icarus* will be particularly useful to biotechnologists regulatory affairs managers and corporate officers of biotechnology firms as well as bioethicists in the academic community Dhanda's peerless text provides a unique tool for understanding and addressing the ethical dilemmas confronting society in the 21st century

**A Merciful End** Ian Robert Dowbiggin, 2003 This is the first full history of the euthanasia movement in the U S It tells for the first time the dramatic story of those reformers who struggled throughout the twentieth century to change the nation's attitudes towards mercy killing and assisted suicide Original wide ranging in scope but sensitive to the personal dimensions of euthanasia *A Merciful End* is an illuminating and cautionary account of tension

between motives and methods within twenty century social reform providing a refreshingly new perspective on an old debate

**Monitoring Stem Cell Research** President's Council on Bioethics (U.S.),2004      **Worst Case Bioethics** George J. Annas,2010 In *Worst Case Bioethics* George Annas employs contemporary disputes involving death and disaster to explore the radical changes underway in public health practice the application of constitutional law to medicine and human rights discourse to promote human health and wellbeing      *Healthcare Decision-Making and the Law* Mary Donnelly,2010-11-18 This analysis of the law s approach to healthcare decision making critiques its liberal foundations in respect of three categories of people adults with capacity adults without capacity and adults who are subject to mental health legislation Focusing primarily on the law in England and Wales the analysis also draws on the law in the United States legal positions in Australia Canada Ireland New Zealand and Scotland and on the human rights protections provided by the ECHR and the Convention on the Rights of Persons with Disabilities Having identified the limitations of a legal view of autonomy as primarily a principle of non interference Mary Donnelly questions the effectiveness of capacity as a gatekeeper for the right of autonomy and advocates both an increased role for human rights in developing the conceptual basis for the law and the grounding of future legal developments in a close empirical interrogation of the law in practice      **The Case Against Assisted Suicide** Kathleen M. Foley,Herbert Hendin,2004-04-29 In *The Case against Assisted Suicide For the Right to End of Life Care* Dr Kathleen Foley and Dr Herbert Hendin uncover why pleas for patient autonomy and compassion often used in favor of legalizing euthanasia do not advance or protect the rights of terminally ill patients Incisive essays by authorities in the fields of medicine law and bioethics draw on studies done in the Netherlands Oregon and Australia by the editors and contributors that show the dangers that legalization of assisted suicide would pose to the most vulnerable patients Thoughtful and persuasive this book urges the medical profession to improve palliative care and develop a more humane response to the complex issues facing those who are terminally ill      **Human Rights and Biomedicine** George P. Smith II,2021-08-04 The eight chapters within this volume are structured around an exploration of the fundamental issues in the field of biomedical human rights dignity and autonomy in not only procreative liberties but throughout the complete cycle of life and death the freedom of scientific inquiry into the new biotechnological methods of collaborative reproduction the right to genetic integrity at birth and throughout life and the equitable right to health or access to health care benefits during life and old age All these central issues are tested of necessity but utilitarian principles which in turn force the templates for decision making evaluate the gravity of harm deriving from a particular human right and its recognition and enforcement measured against the utility of the social economic or cultural good accruing from recognition of such a right in the first instance Ultimately cultural relativism will be seen more often than universality as the determinative point of balance This volume not only informs the ongoing debate on the role of human rights in biomedicine but will also provide enlightened responses to the troublesome issues presented in this new age of biotechnology      *The Practice of Autonomy* Carl

Schneider,1998 Exploring what patients do want gives direction to the author s inquiry into what they should want What patients want he believes is properly more complex and ambiguous than being empowered In this book he charts that ambiguity to take the autonomy principle past current pieties into the uncertain realities of the sick room and the hospital ward The Practice of Autonomy is a sympathetic but trenchant study of the animating principle of modern bioethics It speaks with freshness insight and even passion to bioethicists and moral philosophers about their theories to lawyers about their methods to medical sociologists about their subject to policy makers about their ambitions to doctors about their work and to patients about their lives BOOK JACKET      **No Margin, No Mission** Steven D. Pearson,James Sabin,Ezekiel J.

Emanuel,2003-08-21 Can the ethical mission of health care survive among organizations competing for survival in the marketplace On this question hinges not only the future of health care in the US but that of the health care systems of all advanced countries This book presents both an analytic framework and a menu of pragmatic answers The team of authors physician ethicists from Harvard Medical School and the National Institutes of Health worked with a consortium of health care organizations to explore some of the most challenging dilemmas in health care today How can health plans determine medical necessity in a way that ensures quality care controls costs and builds trust with patients and physicians What are the strategies for caring for vulnerable populations that meet their special needs without dramatically increasing costs To answer these and other similar questions the authors blend ethical analysis with real world example The outcome is a rich analysis of the ethical challenges facing health care organizations combined with tangible examples of exemplary methods to address these challenges This book will help health care leaders regulators and policy makers incorporate exemplary practices and the underlying themes they embody into the very heart and soul of health care organizations      **The Oxford Textbook of**

**Clinical Research Ethics** Ezekiel J. Emanuel,Christine C. Grady,Robert A. Crouch,Reidar K. Lie,Franklin G. Miller,David D. Wendler,2011-02 The Oxford Textbook of Clinical Research Ethics is the first comprehensive and systematic reference on clinical research ethics Under the editorship of experts from the U S National Institutes of Health of the United States the book s 73 chapters offer a wide ranging and systematic examination of all aspects of research with human beings

Considering the historical triumphs of research as well as its tragedies the textbook provides a framework for analyzing the ethical aspects of research studies with human beings Through both conceptual analysis and systematic reviews of empirical data the contributors examine issues ranging from scientific validity fair subject selection risk benefit ratio independent review and informed consent to focused consideration of international research ethics conflicts of interests and other aspects of responsible conduct of research The editors of The Oxford Textbook of Clinical Research Ethics offer a work that critically assesses and advances scholarship in the field of human subjects research Comprehensive in scope and depth this book will be a crucial resource for researchers in the medical sciences as well as teachers and students      **Issues in Palliative Care**

**Research** Russell K. Portenoy,Eduardo Bruera,2003-01-30 Palliative care is rapidly evolving as a multidimensional

therapeutic model devoted to improving the quality of life of all patients with life threatening illness Symptom control management of psychosocial and spiritual concerns decision making consistent with values and goals and care of the imminently dying that is appropriate and sensitive to the unique needs of the individual and the family these are among the critical issues addressed through palliative care As this discipline has evolved the need for research in all these areas has become widely acknowledged Issues in Palliative Care Research describes both the progress that already has been made in the investigation of these issues and the methodologic elements that must be addressed in future studies The perspective is broad and the overriding goal is to inform about the state of the art in these rapidly evolving areas of research
