Alan Stern, 2021-08-10 Once perceived as distant cold dark and seemingly unknowable Pluto had long been marked as the farthest and most unreachable frontier for solar system exploration After Voyager accomplished its final planetary reconnaissance at Neptune in 1989 Pluto and its cohort in the Kuiper Belt beckoned as the missing puzzle piece for completing the first reconnaissance of our solar system In the decades following Voyager a mission to the Pluto system was not only imagined but also achieved culminating with the historic 2015 flyby by the New Horizons spacecraft Pluto and its satellite system the Pluto system including its largest moon Charon have been revealed to be worlds of enormous complexity that fantastically exceed preconceptions The Pluto System After New Horizons seeks to become the benchmark for synthesizing our understanding of the Pluto system The volume s lead editor is S Alan Stern who also serves as NASA s New Horizons Principal Investigator co editors Richard P Binzel William M Grundy Jeffrey M Moore and Leslie A Young are all co investigators on New Horizons Leading researchers from around the globe have spent the last five years assimilating Pluto system flyby data returned from New Horizons The chapters in this volume form an enduring foundation for ongoing study

and understanding of the Pluto system The volume also advances insights into the nature of dwarf planets and Kuiper Belt objects providing a cornerstone for planning new missions that may return to the Pluto system and explore others of the myriad important worlds beyond Neptune

Lars von Trier Beyond Depression Linda Badley, 2022-02-15 Lars von Trier built a reputation as a provocateur from the start but in the late 2000s he entered an even more inflammatory phase Amid Cannes controversies *Antichrist* 2009 *Melancholia* 2011 *Nymphomaniac* 2013 14 and *The House That Jack Built* 2018 brandished the cinematic virtuosity von Trier once banned under the Dogme 95 Manifesto while subjecting audiences to extreme cinema Following von Trier's experience of clinical depression in 2006 and 2007 these films took an aggressively personal and retrospective turn against the backdrop of the director's controversy courting public appearances Playing against widespread assumptions Linda Badley takes a reparative approach offering an in depth examination of these four films and the contexts that produced them Drawing on numerous interviews with the director and his collaborators as well as inside access to archival materials she provides a thorough and comprehensive account of von Trier's preproduction and creative process Highlighting a transmedial turn Badley tracks von Trier's artistic touchstones from Wagner Proust and the Marquis de Sade to Scandinavian erotic cinema and serial killer genre tropes She considers his portrayals of mental illness and therapy gender and sexuality nature and extinction shedding light on the thematic concerns that unite these films as a distinct cycle Offering nuanced readings of these films the book emphasizes the significance of von Trier's work for current critical and philosophical debates showing how they engage with notions of the Anthropocene dark ecology and the postcinematic

analyses Janina Wildfeuer, Claudia Lehmann, 2024-07-30 Multimodality has most recently been described no longer as a research field or discipline on its own but rather as a stage of development within a field Bateman 2022a 49 The realization that 1 many different fields and disciplines now enter their own multimodal phase with new interest in multimodal phenomena and that 2 these disciplines all commit to the development of multimodality research with their own theoretical principles and methodological tools brings with it not only an immense breadth of potential analytical objects but also many new meta methodological issues We need to find ways of combining insights from the variously imported theoretical and methodological backgrounds brought along by previous non multimodal stages of any contributing disciplines Bateman 2022a 49 At the same time the search for a meta methodology for multimodal analyses is pushed further by the recent trend towards more empirical approaches to multimodal phenomena and the development and use of larger multimodal corpora that just as well require theoretical and methodological refinements We need to develop ways of strengthening claims with robustly applicable methods which nevertheless remain firmly anchored theoretically Bateman 2022b 64 For a productive handling of these issues disciplinary triangulation and finding a common language or metalanguage Maton newest results from data collection methods and multimodal corpus analyses that expand the current quantitative work by e g applying existing theories and methods to larger datasets or exploring the newest communication technologies We are particularly interested in seeing how works addressing these aspects contribute to finding ways of productive triangulation and integration for and within a meta methodology for multimodality research This Research Topic aims to bring together scholars from a variety of disciplines interested in multimodality research to review explore and advance the contributions that John Bateman as one of the key figures in multimodality research has made to both theory and method building as well as to the driving forward of multimodal empirical and corpus analyses We welcome contributions that for example critically address the theoretical and methodological advancements that John Bateman has made with regard to the notions of semiotic mode discourse semantics genre textuality etc apply one of the many approaches that John Bateman has developed for the empirical analysis of multimodal artefacts e g the GeM model for page based documents his work on multimodal film and audio visual analysis and the discourse semantics and or annotation approach to visual narratives to larger corpora or currently newly developing communicative situations expand on one of the abovementioned aspects with new ideas and insights from disciplines that have not yet been included in multimodality research Expressiveness in music performance Dorottya Fabian, Renee Timmers, Emery Schubert, 2014-07-03 What does it mean to be expressive in music performance across diverse historical and cultural domains What are the means at the disposal of a performer in various time periods and musical practice conventions What are the conceptualisations of expression and the roles of performers that shape expressive performance This book brings together research from a range of disciplines that use diverse methodologies to provide new perspectives and formulate answers to these questions about the meaning means and contextualisation of

expressive performance in music The contributors to this book explore expressiveness in music performance in four interlinked parts Starting with the philosophical and historical underpinnings crucially relevant for Western classical musical performance it then reaches out to cross cultural issues and finally focuses the attention on various specific problems including the teaching of expressive music performance skills The overviews provide a focussed and comprehensive account of the current state of research as well as new developments and a prospective of future directions This is a valuable new book for those in the fields of music music psychology and music education *Music, Sound and Sensation* Fritz Winckel, 2014-05-05 Related closely to the field of physical acoustics is that of psychoacoustics which deals with the phenomena of musical hearing from a psychological and aesthetic point of view One of the major contributors to our understanding of the subject is Fritz Winckel When this book first appeared in German in 1960 reviewers pressed for an English translation This Dover volume is an answer to that demand it makes Professor Winckel's important study generally available to English language readers for the very first time It has been extensively revised and updated by the author In his thought provoking study Professor Winckel applies the findings of technical researches in acoustics to the practice of music covering many different aspects of recent psychoacoustical researches the evaluation of loudness and the dissolution power of the ear the influence of the acoustical properties of the concert hall on the hearing process the function of time variation and rhythm in musical perception the evaluation of the sound spectrum including the unharmonic components He surveys extensively the German and English literature in the field organizing his information into chapters on stationary sound the onset behavior of sound the concept of space the concept of time the evaluation of sound through the hearing mechanism unclarity in musical structures simultaneously sounding tones electroacoustic sound structure and the effect of music on the listener This book should prove equally useful to acousticians sound engineers and others working in this area of applied physics and to composers performers and musicologists concerned with the technical aspects of music Psychologists working in the field of sense perception will also find much of value here New translation by Thomas Binkley of the 1960 German edition of *Phänomene des musikalischen Hörens* with revisions and corrections by the author
